Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

EUROPEAN CAR SERVICE & PARTS (Continued) **1000340158**

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 01/28/2020. OBSERVATION: In the outside storage shed is a partially full black 55 gallon drum labeled as hazardous waste coolant. It was marked with the accumulation start date of 8-27-17. Disposal records also indicate that the most recent pick up of used coolant was on 8-27-17. This waste has been on site for longer than one year. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit. Within 30 days provide a copy of the disposal record to the San Mateo County (SMC) Certified Unified Program Agency (CUPA).

Violation Date: 01-22-2020
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 01/28/2020. OBSERVATION: In the outside storage shed is a partially full black 55 gallon drum of drained used oil filters. It was left open. During the inspection, the lid was placed back on this drum. CORRECTIVE ACTION: Ensure that containers of drained used oil filters are kept closed unless adding or removing waste. OBSERVATION: In the outside storage shed is a partially full black 55 gallon drum of drained used oil filters. It was marked with the accumulation start date of 12-12-18. This waste has been on site longer than one year. CORRECTIVE ACTION: Immediately properly dispose of the drained used oil filters. Within 30 days, submit a bill of lading to this department demonstrating proper disposal.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

CERS Description: Hazardous Waste Generator

Violations:
Site ID: 116779
Site Name: FIVE STAR AUTO BODY WORKS
Violation Date: 06-22-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 06/22/2018. OBSERVATION: The approximately half full 30 gallon blue poly drum of water based paint waste was not marked with any of the required hazardous waste information. The approximately half full poly drum of hazardous waste coolant was not marked with the physical state and hazardous property. During the inspection, the required information was marked on these drums. CORRECTIVE ACTION: Continue to ensure that all containers of hazardous waste are properly labeled.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 116779
Site Name: FIVE STAR AUTO BODY WORKS
Violation Date: 01-26-2016
Citation: 22 CCR 12 66262.34(b)(1) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(b)(1)
Violation Description: Failure to dispose of hazardous waste after the first 100-kilogram threshold amount was accumulated within a 90 day period.
Violation Notes: Returned to compliance on 02/16/2016. Unlabeled waste oil and coolant exceeded disposal threshold based on manifest records. Dispose within

FIVE STAR AUTO BODY WORKS (Continued) **S121740000**

30 days and send inspector copies (photos) of manifests. Ensure each wastestream is disposed annually.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
Registry ID: 110071748400

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

Site ID: 431991
Site Name: AT&T California - P2011
Violation Date: 01-03-2019
Citation: 23 CCR 16 2665(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665(b)
Violation Description: "Failure to submit a copy of the overfill prevention equipment inspection results on the Overfill Prevention Equipment Inspection Report Form to the UPA within 30 days after the inspection. "
Violation Notes: Returned to compliance on 01/29/2019. OBSERVATION: For USTs installed before October 1, 2018, perform an overfill prevention inspection by October, 13, 2018 and every 36 months thereafter. This 10-13-18 required inspection has not yet been conducted and the required corresponding overfill prevention inspection report (Appendix IX form) for this test has not yet been received by the SMC CUPA. This report should have been received 30 days after the required 10-13-18 overfill prevention equipment inspection. CORRECTIVE ACTION: Submit a copy of the overfill prevention equipment inspection results on the Overfill Prevention Equipment Inspection Report Form to the SMC CUPA within 30 days.

Violation Date: 01-06-2021
Citation: 23 CCR 16 2716(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(f)
Violation Description: Failure to maintain on-site, or off-site at a readily available location if approved by the UPA, copies of Designated Operator inspection records as follows: Designated operator monthly inspection records for inspections performed before October 1, 2018 must be kept

AT&T CALIFORNIA - P2011 (Continued) **S121783832**

	for 12 months from the month of inspection. For inspections performed on or after October 1, 2018, copies of the "Designated Underground Storage Tank Operator Visual Inspection Report" must be kept for 36 months from the month of inspection.
Violation Notes:	Returned to compliance on 01/06/2021. OBSERVATION: The 2020 designated operator (DO) monthly inspection reports listed the SB989 test as 5-28-19. Test records on site indicated that this test occurred 5-23-19. During the inspection, the facility contact agreed to ensure that the DO will be completing the monthly inspection reports accurately to include writing the accurate test dates on the monthly DO reports. CORRECTIVE ACTION: Continue to ensure that the DO will be completing the monthly inspection reports accurately to include writing the accurate test dates on the monthly DO reports.

Violation Date:	04-21-2017
Citation:	HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description:	Business Plan Program - Release/Leaks/Spills - General
Violation Notes:	Returned to compliance on 05/30/2018. OBSERVED: A few plastic caps (plastic cap with embossed letters "GLOBE") on the top of the batteries on the third floor were cracked (vent, specific gravity port, or temperature monitoring port?). Eye wash stations in the battery area in a portion of the basement are not provided on each string of batteries, which is not consistent with the other battery strings observed. Also, one area had 5 eye wash stations mounted on the wall with no eye wash solution. REQUIRED ACTION: Please asses all equipment and repair/replace as necessary. Assess all emergency response equipment and provide the adequate amount of eye wash kits. If the empty eye wash stations are not needed, remove them.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill

AT&T CALIFORNIA - P2011 (Continued) **S121783832**

prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 01/03/2019. OBSERVATION: For USTs installed before October 1, 2018, facilities are required to perform an overfill equipment prevention inspection by October, 13, 2018 and every 36 months thereafter. This was not done by 10-13-18. During today's monitoring system certification, the overfill prevention equipment inspection was conducted. CORRECTIVE ACTION: Continue to schedule and perform the required testing every 36 months.

Eval Notes: Valerie Ingraham, vi1560@att.com Facility is a "Central Office" wire line facility. Facility stores 15,000 gallons of diesel fuel for emergency generator power. 1,000 gallons sulfuric acid equivalent on second floor, 1,200 gallons on third floor, 3,040 gallons in basement. Facility inventory is greater than the storage capacity is currently established. Post inspection the storage capacity will need to increase to >3,500 gallons (PE 2165). This is a permit category issue. Only real affect will be permit program element and increased fees. County to make changes and a new invoice will be submitted to the facility. Ensure that any significant changes in inventory volume are revised in the electronic documents within 30 days of the change.

Facility stores 15,000 gallons of diesel fuel for emergency generator power. 1,000 gallons sulfuric acid equivalent on second floor, 1,200 gallons on third floor, 3,040 gallons in basement. Inactivating the program. RECOMMEND: Should ATT determine that waste is being generated on-site, notifiy the County within 30 days of initial generation. This program will need to be reactivated for inspection/compliance oversight. Otherwise, the County will likely inspect the facility for hazardous waste evaluation as a "Service Request" status to reconcile the active EPA ID number with the absence of a hazardous waste generator declaration in the HMBP.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 11/18/2019. OBSERVATION: Employee HMBP training records were not provided for review at time of inspection. CORRECTIVE ACTION: Provide all employees with required training that includes: safe handling hazardous materials, emergency response procedures, and proper use of response equipment. Maintain records of training available for 3 years. Within 30 days submit a copy of the employee HMBP training records to the SMC CUPA.
Violation Division: San Mateo County Environmental Health

Site ID: 127151
Site Name: KAISER PERMANENTE MEDICAL CENTER
Violation Date: 10-17-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 11/18/2019. OBSERVATION: The Hazardous waste closet on the first floor has a partially full black plastic 10 gallon hazardous waste container was not marked with the proper physical state and contents. CORRECTIVE ACTION: Within 30 days, submit confirmation to the SMC CUPA demonstrating that the container listed above has been properly labeled.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

RICHARDS AUTO REPAIR (Continued) **S121745861**

Site Name: RICHARDS AUTO REPAIR
Violation Date: 06-27-2019
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 06/27/2019. Two of the 6 used oil drums bungs were not closed. One 55 gallon waste coolant drum's bung was not closed. Bungs were closed during inspection. Facility rep stated he kept reminding his employees to make sure that bungs are closed when not actively adding used oil or waste coolant.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-03-2024
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: CAL000300876 Onsite for routine inspection. Manager Sam Ortiz provided access. Facility generates waste oil, waste antifreeze, used filters. Hazardous waste labels indicate that the oil and antifreeze were last disposed of in July 2023, and the filters in September 2023, however no hazardous waste manifests could be provided during the inspection to verify. Sam stated that Barry would return from vacation on the 11th and would be able to provide copies of manifests then. One drum was waste oil, and one drum of waste anitfreeze had funnels removed and bung caps closed during the inspection. Ensure that all containers of hazardous waste remain closed except when adding or removing waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name: JAPAN AUTO SERVICE
Address: 1121 SAN MATEO AVE
City,State,Zip: SAN BRUNO, CA 94066
Site ID: 39425
CERS ID: 10069756
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 39425
Site Name: JAPAN AUTO SERVICE
Violation Date: 01-30-2024
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Ensure that collection containers are emptied daily, antifreeze, drained oil filter drum, and other collection containers are emptied.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 39425
Site Name: JAPAN AUTO SERVICE
Violation Date: 10-06-2017
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 12/19/2017. OBSERVATION: The drum of drained used oil filters lacked an accumulation start date. The most recent pick up of one 55 gallon drum of drained used oil filters occurred on 9-21-16. During the inspection the accumulation start date of 9-21-16 was added. This waste has been on site longer than one year. CORRECTIVE ACTION: Immediately properly dispose of the drained used oil filters and submit a copy of the disposal record to the SMC CUPA within 30 days.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal of acute/extremely hazardous waste after the first 1-kilogram threshold amount was accumulated within a 90 day period.
Violation Notes:	Not reported
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	39425
Site Name:	JAPAN AUTO SERVICE
Violation Date:	10-06-2017
Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 10/16/2017. OBSERVATION: The partially full hazardous waste tank of used coolant has an accumulation start date of 3-12-15. The partially full hazardous waste tank of used oil has an accumulation start date of 2-15-17. These wastes have been on site longer than six months. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the SMC CUPA within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	39425
Site Name:	JAPAN AUTO SERVICE
Violation Date:	10-16-2019
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 10/16/2019. Some spilled oil was observed on the shop floor next to the used oil tank and the used coolant tank. During the inspection, the owner cleaned up the spilled oil with shop rags.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Ensure to label all containers containing waste or hazardous materials. New oil tank should be labeled as new oil, remove used oil filter label.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-30-2024
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Within 30 days, conduct annual maintenance to fire extinguishers, properly label waste containers with hazardous waste label, ship out oil filter drum as the shipment is beyond 180 days holding time, put dirty rags in closed container, ensure complete draining of waste oil containers before putting into trash, close fluorescent light tubes and label with universal waste label and date (ensure disposal within 1 year), place hazardous waste label on gasoline drum, antifreeze bucket.

Eval Notes: Received the following message: Hi Aris, I sent business plan 2 times but the response was that it needs to be resubmitted. Maybe I was not doing right way. I sent it third time but there is no response. I like to do it forth time and I need a response first before I try it. Please let me know. Thank you. Aki, Reviewed the HMBP submittal and did not accept it. Emailed the following response: In the Regulated Activities section: Is this a Household Hazardous Waste (HHW) Collection site? This should "NOT" be checked. Please update and resubmit. Thank you.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

U S NAVY SITE SAN BRUNO (Continued) **1006804892**

storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name: MARFORRES MCRC SAN BRUNO
Address: 900 COMMODORE DR
City,State,Zip: SAN BRUNO, CA 94066
Site ID: 448
CERS ID: 10341082
CERS Description: Hazardous Waste Generator

CERS:
Name: MARFORRES MCRC SAN BRUNO
Address: 900 COMMODORE DR
City,State,Zip: SAN BRUNO, CA 94066
Site ID: 448
CERS ID: 10341082
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 448
Site Name: MARFORRES MCRC San Bruno
Violation Date: 05-09-2022
Citation: 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description: Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.
Violation Notes: Returned to compliance on 02/15/2023. Observation: During the inspection, the fire extinguisher tabs were marked 2016. Corrective action: Have the fire extinguishers charged/certified by the comply by date.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 448
Site Name: MARFORRES MCRC San Bruno
Violation Date: 12-05-2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 12/05/2017. OBSERVATION: Dark oil stains were observed in the parking lot where the vehicles are stored. During the inspection, dry sweep was used to clean up the dark oil stains. CORRECTIVE ACTION: Continue to ensure that dark oil stains are clean up and the waste generated from the clean up is properly managed.

Violation Source:	CERS,
Site ID:	448
Site Name:	MARFORRES MCRC San Bruno
Violation Date:	05-09-2022
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 05/09/2022. Observation: The facility map did not include the evacuation staging area. This was the reason for previous HMBP rejection. Corrective action: None, corrected on site.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP

MARFORRES MCRC SAN BRUNO (Continued) **S121785892**

Violation Source:	CERS,
Site ID:	448

Violation Date:	12-05-2017
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 01/17/2018. OBSERVATION: Designated facility signed copies of the Uniform Hazardous Waste Manifests from 2014, 2015, 2016, and 2017 were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of the designated facility signed manifests from 2014, 2015, 2016, and 2017 and submit copies to the SMC CUPA within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW

Site Name:	MARFORRES MCRC San Bruno
Violation Date:	12-05-2017
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 12/05/2017. OBSERVATION: Documentation for the reservist's hazardous material training within the past 12 months was not found on site. During the inspection, the documentation was completed. CORRECTIVE ACTION: Continue to document hazardous materials training and maintain records of training available for 3 years.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	448
Site Name:	MARFORRES MCRC San Bruno
Violation Date:	12-05-2017
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 02/22/2018. OBSERVATION: In the hazardous waste storage area is a 5 gallon bucket of hazardous waste grease with a start date of 1-11-17. This has been on site longer than 180 days.

MARFORRES MCRC SAN BRUNO (Continued) **S121785892**

CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site Name: MARFORRES MCRC San Bruno
Violation Date: 12-05-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 12/05/2017. OBSERVATION: In the hazardous waste storage area were 16 five gallon buckets, two 55 gallons drums, two one gallon plastic jugs, and two one quart cans of hazardous waste chemicals. These partially full containers of hazardous waste were completely labeled with the required hazardous waste information. A 55 gallon drum of hazardous waste pads in the maintenance bay lacked the physical state. During the inspection, the required information was marked on these containers. CORRECTIVE ACTION: Continue to ensure that all containers of hazardous waste are marked with the required information.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 419164
Site Name: AUTOWORLD COLLISION
Violation Date: 02-02-2021
Citation: 22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description: Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes: Returned to compliance on 04/12/2021. Facility did not have any manifest, only bill of lading. Dan will check with waste hauler as to where the copies may be.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 419164
Site Name: AUTOWORLD COLLISION
Violation Date: 01-09-2019
Citation: 40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description: Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes: Returned to compliance on 03/26/2019. Facility fire extinguishers need to be certified for 2019. They were last certified in August 2016
Also, there is no proper eyewash station available. Recommend a plumbed eyewash station in the shop or attached to the sink.

Violation Date:	10-06-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 05/10/2018. OBSERVATION: Oil was left to accumulate in an open and unlabeled bin underneath the used oil filter crusher. Hazardous waste drained used oil paper filters were left to accumulated in two unlabeled and open plastic bins. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.
Violation Division:	San Mateo County Environmental Health

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 11/14/2019. OBSERVATION: The partially full drum of drained used paper filters (solids contaminated with oil) has an accumulation start date of 1-1-18. This waste has been on site longer than 180 days. CORRECTIVE ACTION: Immediately properly dispose of hazardous waste that has been stored over the applicable time limit. Within 30 days, provide a copy of the disposal record to the SMC CUPA.

Eval Type: Other, not routine, done by local agency
Eval Notes: On site to verify that the open violations have been corrected. The following has been verified during the site visit: The spilled oil on the shop floor and 55 gallon drums has been cleaned up. Winton Wong stated that he used the shop rags to wipe up any spilled oil and uses Aramark to clean the rags. Drained used oil filters have been placed into the properly marked drum of drained used oil filters. The modified emergency contingency plan has been completed and posted in the office. All containers of hazardous waste have been properly labeled with the required information and are being kept closed unless adding or removing the waste.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
Registry ID: 110071754252

Violation Date:	07-19-2019
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 07/19/2019. OBSERVATION: The partially full 55 gallon drum of used oil is marked with an accumulation start date of 6-9-18. During the inspection the accumulation start date was updated to 4-25-19 based upon the hazardous waste disposal manifests on site. The partially full 55 gallon drum of used antifreeze is marked with an accumulation start date of 6-8-18. During the inspection the accumulation start date was updated to 1-14-19 based upon the hazardous waste disposal manifests on site. CORRECTIVE ACTION: Continue to ensure that all containers of hazardous waste are properly labeled, including the correct accumulation start date.

	1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 07/13/2017. There is a large amount of standing oil in the secondary containment trough for the oil. This needs to be cleaned up immediately. Additionally, there is a large amount of oil on the top of the waste oil drum, and there are residual spills throughout the shop. Finally, there were bottles of new oil in the trash that still had residual amounts of oil. All oil containers need so be completely empty before being thrown in the trash. There can be no pourable liquid left in these containers. Drain them properly to ensure they are empty before disposing of these containers. Provide proof that the shop has been cleaned up and cotianers are properly being managed within 30 days.

Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-13-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: EPA ID Number CAL000354705 Inactive. Waste generated: Used oil, filters, coolant.
Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-19-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine inspection. The facility has up to the following on site: WASTE ANTIFREEZE ETHYLENE GLYCOL 55.0 Gallons WASTE PETROLEUM MOTOR OIL 55.0 Gallons
Eval Division: San Mateo County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-19-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine inspection. The following have been picked up: On 4-25-19, 50 gallons of used oil. On 1-24-19, 50 gallons of used oil. On 1-14-19, 30 gallons of used coolant.
Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-21-2023
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Last Hazardous Materials Business Plan (HMBP) submittal was 9/16/2021 and the annual submittal of 9/16/2022 and 9/16/2023 is overdue. Within

NOR CAL (Continued) **S121744000**

30 days, submit the HMBP through the California Environmental Reporting System (CERS) at https://cers.calepa.ca.gov/
Eval Division: San Mateo County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 12-28-2022
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Came to facility to close out two open violations. Violations have not been corrected. Used absorbent is not being managed as hazardous waste and placed in a bucket with a label. Oil filters have not been disposed of, facility EPA ID is also inactive. Instructed facility on how to activate the EPA ID number. Email will be sent to facility giving them two weeks to comply or may be referred for enforcement. Labels were filled out and given to the facility for the absorbent and the oil filters.
Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 10-02-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: HMBP submittal reviewed and accepted.
Eval Division: San Mateo County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 10-02-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site to conduct a follow up hazardous materials inspection. During the inspection, the HMBP was updated and submitted. The following violation is still open: OBSERVATION: Facility could not demonstrate that the property owner has been notified in writing that business is subject to HMBP program and has complied. CORRECTIVE ACTION: A sample property owner notification form will be emailed along with this inspection report. Fill out the letter, submit a copy to your landlord, keep a copy on site, and submit a copy to SMCUPA within 30 days.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System

APPAREL CITY SEWING MACHINE CO (Continued) **1000252313**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Registry ID: 110002343456

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Extracted from URS documents San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced reports. The former DuPont plant in South San Francisco was an active paint manufacturing operation from 1934 through 1982. Peak production at the plant occurred in 1955, when employment reached 250 workers. In 1982, operations were reduced, and from 1982 until September 2000 the facility was used mainly for warehousing paints and quality control testing of bulk paints that were shipped to the NUMMI plant in Fremont, California. In 1985, DuPont sold one of its parcels (150 South Linden Avenue) to Bay Cities Building Materials. In September 2000, Intrinsic Ventures LLC of Menlo Park, California, purchased the remaining parcel (160 South Linden Avenue) from DuPont. The Site is currently being used for commercial occupancy. The Site is located on a bay plain about 1.5 miles west of San Francisco Bay. The Site is located at an elevation of about 20 feet above sea level and slopes gently northwestward. A map prepared by the U.S. Geological Survey shows that old marshlands, that have been covered with man-made fill, begin about 500 feet northeast of the site and extend to the edge of San Francisco Bay. On the U.S. Geological Survey map the Site is shown as being underlain by the Quaternary age Colma Formation, which is composed of sand, sandy clay, and silty sand. Toward San Francisco Bay, younger alluvium and bay mud overlie the Colma Formation. Depth to groundwater at the Site during the latest monitoring event on June 14, 2007 ranged from 5.38 to 8.57 feet bgs. The average direction of groundwater flow for that date was to the northeast at an average gradient of 0.013 feet per foot. The entire area from the Site eastward to San Francisco Bay is developed as industrial and commercial properties. Industrial and commercial properties also extend north, west, and south from the Site. There are no residential properties in the vicinity of the Site. Several investigations have been conducted at the Site to characterize its soil, groundwater quality, and hydrogeologic conditions. In general, these investigations were designed to evaluate the extent of impacted soils and groundwater beneath the Site and to assess the hydrogeologic conditions. Groundwater monitoring is ongoing at the Site. DuPont Environmental Remediation Services (DERS) performed a limited Environmental Assessment of the Site in 1991. Eleven soil borings were advanced at locations selected after a review of historical site activities. Soil samples were collected from each boring. The soil analytical results from this investigation showed the presence of impacted soils in the area of the former tank farm. Soils were impacted with BTEX and other volatile organic compounds (VOCs), including acetone, 2-butanone, hexanone, methylene chloride, and di-nbutylphthlate. In October 1998, URS Greiner Woodward-Clyde performed a Phase II Environmental Site Assessment (ESA) at the Site. Eleven more soil borings were advanced at locations based on the results of the DERS investigation and a historical review of Site activities. Soil and groundwater samples were collected at each

DUPONT (Continued) **1000925659**

boring. In addition, shallow soil samples were collected at five other locations. Toluene, ethylbenzene, xylenes, TPH-gas, and total petroleum hydrocarbons as diesel (TPH-diesel) were detected in over half of the soil samples. Benzo(a)pyrene, di-n-butylphthalate, and naphthalene were detected in soil samples from the tank farm area. BTEX, acetone, 2-butanone, 1,2-dichloroethane, and several semi-volatile organic compounds (SVOCs) were detected in Site groundwater samples. Site Specific Target Levels (SSTLs) were prepared for several future use scenarios in response to a County request and submitted with the Phase II ESA Report. URS performed a remedial investigation at the Site in July 1999. Among other tasks, the remedial investigation included collection and analysis of groundwater samples from the former tank farm area. The remedial investigation results indicated a potential hydrocarbon plume (TPH-mineral spirits, toluene, ethylbenzene, and xylenes) in groundwater that extended from the former tank farm area to South Linden Avenue. DuPont conducted a soil removal action in May-July 2000 under the direction of the County. URS submitted a remedial action report on July 26, 2000 that detailed the source removal activities performed as part of this action. The excavations were backfilled with imported clean bank-run fill material. In August 2000, four monitoring wells were installed in accordance with the work plan. Three monitoring wells were installed along the centerline of the plume and are being sampled in accordance with the groundwater monitoring and reporting plan. The fourth well was installed at an upgradient location and serves as a background well. Five quarters of groundwater monitoring were performed from December 2000 through December 2001 to investigate plume stability at the Site. Because the sampling results indicated a stable plume, the County approved a change to semiannual monitoring beginning in June 2002. In December 2002, URS performed an off-site groundwater investigation to evaluate possible off-site groundwater impacts of the former DuPont Automotive Products facility, in response to the San Mateo County Health Services Agency request for investigation. The investigation activities included sampling and analysis of shallow groundwater in two areas. The first area of investigation was along the border between the former DuPont Automotive Products facility and the adjacent Bay Cities Building Materials site. The second area of investigation occurred in the roadway on South Linden Avenue. Six soil borings were advanced and groundwater was collected from the temporary wells installed in the borings. Analytical results showed that the risk-based screening levels (RBSLs), based on exposure to vapor emissions from groundwater in indoor environment, were not exceeded at the sampled locations. Hence, it was concluded that the former DuPont Automotive Products facility was not causing human health concerns at the adjacent Bay Cities Building Materials site or in the roadway of South Linden Avenue. In a letter dated July 28, 2003, the County approved the elimination of groundwater analysis for TPH-gas, total petroleum hydrocarbons as mineral spirits (TPH-mineral spirits), and equipment blanks based on the submitted groundwater monitoring data. In 2003, the County notified DuPont by letter that the Site would need to be remediated to a residential standard unless a new, separate deed restriction was recorded for the Site. In a letter dated September 14, 2005, the County requested that DuPont compare historical Site soil and groundwater data with San Francisco Bay Region Water Quality Control Board Environmental Screening Levels (ESLs) for a hypothetical future residential land use of residential

DUPONT (Continued) **1000925659**

slab-ongrade construction. In response to the County s request, DuPont submitted the Current Conditions Report on March 31, 2006. On June 8, 2006, the County requested that a Work Plan be submitted to establish cleanup goals and either propose additional Site characterization based on the residential land use criteria or evaluate several remedial alternatives. As a result of previous investigations and removal actions, concentrations and distributions of constituents of concern are well understood over much of the Site. However, as stated in DuPont s July 3, 2006, recommendations for further characterization in the Amendment to the Current Conditions Report, additional groundwater sampling was needed to address data gaps pertinent to an assumed future residential use with slab-on-grade construction. In a letter dated July 18, 2006, the County provided comments and requested that additional groundwater data be collected as part of the Work Plan to assess plume stability. On August 10, 2006, DuPont submitted the Site Characterization Work Plan for Potential Future Residential Use, which presented the proposed work scope to further characterize and evaluate on-site soil, groundwater and soil gas based on a future hypothetical residential land use scenario, assuming slab-on-grade construction. The Work Plan was prepared in response to the County s letters of June 8 and July 18, 2006. The Work Plan also presented a proposed scope of work to further evaluate and characterize the stability of the groundwater plume, both on-site and off-site, in response to the County s letter of July 18, 2006. In a letter dated September 6, 2006, the County indicated acceptance of the work plan with modifications including analysis for hexavalent chromium in soil, evaluation of soil ecotoxicity screening levels, unsuitability of GeoprobeTM methods for geotechnical sampling, and collecting samples from the adjacent downgradient property location. In a letter dated November 22, 2006, the County indicated that it had received verification of the commercial deed restriction cosigned by San Mateo County, and that the deed restriction may decrease the scope of, but not necessarily eliminate, the Work Plan submitted on August 10, 2006. In a meeting with URS on December 5, 2006, the County agreed to a modification of the scope of work in the work plan to include only characterization of the on-site and off-site stability of the toluene plume in groundwater. The revised scope of work was summarized in a letter from URS to the County dated December 22, 2006. A subsurface investigation to characterize the groundwater toluene plume stability on-site and off-site was performed on January 31 and February 1 and 2, 2007. Fourteen grab groundwater samples were collected and analyzed for BTEX, acetone, 2-butanone (MEK), 4-methyl-2-pentanone (MIBK), 1,2-dichloroethane (DCA), and naphthalene. The data show that constituent levels exceeded RWQCB ESLs for groundwater as a potential drinking water resource at several sample locations on the Site and the adjacent property at 150 South Linden Avenue. None of the groundwater sample results exceed the Site-Specific Target Levels (SSTLs) developed for the Dupont facility or the RWQCB ESLs for indoor air impact in a commercial/industrial land use scenario with highly permeable soils. DuPont submitted the Site Groundwater Plume Stability Characterization Report on April 25, 2007, and concluded in the report that upgradient and crossgradient extents of the main contaminant plume in shallow groundwater had been substantially delineated. The report also concluded that the downgradient offsite extent of the main contaminant plume in shallow groundwater had not been fully delineated; however, the plume appeared to narrow

DUPONT (Continued) **1000925659**

substantially to the east beyond the west margin of South Linden Avenue. The June 14, 2007 groundwater monitoring results showed benzene, toluene, ethylbenzene, xylenes, acetone, 2-butanone (MEK) and 4-methyl-2-pentanone (MIBK) in monitoring well MW-1 at concentrations of 170 micrograms per liter (8g/L), 150,000 8g/L, 4,700 8g/L, 23,000 8g/L, 8,200 8g/L, 110 8g/L and 790 8g/L respectively (URS 2007b). Well MW-1 is the well closest to the former source area and is upgradient to the Central Concrete Supply Company (former Bay Cities Building Materials) site. In the July 1999 remedial investigation, two borings, A1 and A2, were advanced at the property boundary between the former DuPont site and the Bay Cities Building Materials site, and three borings, B1, B2, and B3, were advanced in South Linden Avenue roadway, adjacent to the two sites. In July 1999, BTEX was detected at both borings advanced at the property boundary, A1 and A2. Benzene was detected at concentrations of 100 8g/L at boring A1 and 200 8g/L at boring A2. Toluene was detected at concentrations of 45,000 8g/L at boring A1 and 110,000 8g/L at boring A2. Ethylbenzene was detected at concentrations of 3,000 8g

Alternate City,St,Zip:	S SAN FRANCISCO, CA 94080
Background Info:	The Site is located in an industrial area. There is a one-story building and a warehouse on the Site, which is used for automotive storage. A portion of the Site is leased to a wood pallet company and another portion is used for storage of inactive AT&T vehicles. From 1935 to 2000, DuPont de Nemours (DuPont) owned the Site. DuPont manufactured automotive paints and varnishes until 1982, and warehoused and distributed their products until 1990. Deerfield Realty Corporation acquired the Site in September 2000 and plans to develop it as a Class A office park.
Comments Date:	08011980
Comments:	independent of drive-by; same address as Koningsberg
Comments Date:	08011980
Comments:	Electronics, Inc, (#41360066).
Comments Date:	11212002
Comments:	Completed Site Screening. In 1991, soil samples were collected
Comments Date:	01011983
Comments:	Certified Site. 1600 tons of hazardous waste was removed. No
Comments Date:	01011983
Comments:	month and day information was available. January 1 chosen
Comments Date:	01011983
Comments:	because it gives the earliest statute of limitations date.
Comments Date:	01161981

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	A 3,000 gallon UST was removed from the site on November 18, 1999. TPHd, TPHg, and benzene were found in soil,and subsequent investigation in 2001 discovered TPHd and benzene in groundwater. Dual phase extraction was conducted in 2011; 2015 groundwater data confirmed water quality objectives were achieved for all petroleum related parameters except benzene. Remaining benzene concentrations in groundwater are limited and stable. 2018 Soil vapor and indoor air monitoring data indicate soil vapor has been impacted by benzene with highest concentrations in the northeast corner of the vacant warehouse; indoor air concentrations do not exceed commercial 8-hour exposure ESLs; outdoor air benzene concentrations are nearly double the indoor air values. No further corrective actions are required for UST site. Closure package completed and distributed to RP in November 2019.

RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)
Site History: The site is a vacant, 20-foot high warehouse building constructed in 1963. From 1963 to 1972, the warehouse was leased to a wood cabinet maker. In 1972, the site was leased to San Bruno Auto Center, a towing and auto repair facility, which installed and operated a 3,000-gallon underground fuel storage tank (UST) and equipment for its tow trucks. Since 1971 Phase II Corporation (Phase II), a printed circuit board manufacturer, leased the adjacent property and in 1983, leased the site itself. Phase II operated a plating and etching facility at the site.The operation used hazardous materials and generated hazardous waste during its operation, treating and discharging approximately 500,000 gallons/month of process water to the sewer. The site was abandoned in 1998 when the company went bankrupt. In 1998, the San Mateo County Health Services Agency notified the property owner that the facility must be decommissioned, decontaminated, and closed.The facility was closed until 1999 and the warehouse was leased to a garment cutting business, Juan s Cutting Service, and then to an automobile towing company, Aaces Towing. A TCE/DCE/VC/benzene plume extends offsite under adjacent buildings and under Montgomery Ave. Two on-site source areas associated with past operations: SW of the building and beneath the former storage area in front part of building.San Bruno does use some groundwater to supplement the water supplied via the Hetch Hetchy/SFPUC. This site is not impacting the groundwater used for drinking water, although the cleanup will require achieving drinking water standards.

CERS ID:	836927
CERS Description:	Industrial Facility Storm Water

Violations:

Site ID:	64357
Site Name:	SAN BRUNO TRANSFER STATION
Violation Date:	02-19-2020
Citation:	22 CCR 16 66266.81(a)(4)(B) - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.81(a)(4)(B)
Violation Description:	Failure to retain for at least three years a legible copy of each manifest or bill of lading which identifies spent lead-acid storage batteries shipped to a person who stores the batteries or who uses, reuses, recycles or reclaims the batteries or their components.
Violation Notes:	Returned to compliance on 02/19/2020. OBSERVATION: During the inspection, the disposal records for spent lead acid batteries was not provided. During the inspection, the employees confirmed that more than 10 spent lead acid batteries are year are taken to interstate battery for proper disposal/recycling. During the inspection, the employees agreed to maintain disposal records for spent lead acid batteries for three years. CORRECTIVE ACTION: Continue to ensure that disposal records for spent lead acid batteries are maintained for three years.

Violation Description:	Failure to retain for at least three years a legible copy of each manifest or bill of lading which identifies spent lead-acid storage batteries shipped to a person who stores the batteries or who uses, reuses, recycles or reclaims the batteries or their components.
Violation Notes:	Returned to compliance on 06/10/2022. OBSERVATION: Records for recent lead-acid battery pick-ups/drop-offs at Interstate Batteries were not available during the inspection. They were recorded in the prior year

SAN BRUNO TRANSFER STATION (Continued) **S113020061**

binder. The facility typically collects more than 10 batteries per year and multiple-levels of batteries were observed stored on a pallet in the storage locker. It is not clear if the facility stores 1 ton or more of batteries and how long they have been stored on site. No leaking batteries observed. REQUIRED ACTION: Submit a bill of lading for transporting lead-acid batteries to Env. Health by 5/20/22.

Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 64357
Site Name: SAN BRUNO TRANSFER STATION
Violation Date: 05-06-2022
Citation: 22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34
Violation Description: Failure to label or mark each individual or container or the designated area of universal waste as required. 1) Waste batteries shall be marked with "Universal Waste-Battery(ies) . 2) Mercury containing equipment shall be marked with "Universal Waste -Mercury-Containing Equipment . 3) Lamps shall be marked with Universal Waste-Lamp(s) . 4)Each electronic devices or the container or the designated area shall be marked with Universal Waste-Electronic Device(s) . 5) Each CRTs or the container or the designated area shall be marked with "Universal Waste-CRT(s) . 6) CRT glass or the designated area shall be marked with Universal Waste-CRT glass .
Violation Notes: Returned to compliance on 06/03/2022. OBSERVATION: The following universal wastes were observed to be missing labels. - Boxes of electronics (corrected on site). - Individual CRT or flat screen units. - Small boxes of lamps - Containers of small batteries (one mislabeled as hazardous waste compressor oil) REQUIRED ACTION: Submit pictures showing that each universal waste collection container is labeled with a complete filled out hazardous waste label. Note: Ensure that universal waste lithium ion batteries have been properly taped at the terminal ends. Also, if batteries are found to be leaking, store them in a closed container.

SAN BRUNO TRANSFER STATION (Continued) **S113020061**

Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 06/03/2022. OBSERVATION: Totes and bins inside the hazardous waste locker were not closed and labeled. Each individual container that was able to be observed appeared to be closed, however the hazardous waste label was on the outside of the locker. REQUIRED ACTION: Either provide a label on each hazardous waste container (each product, ex. quart bottle of flammable liquid) or place compatible products into a container and provide a completed hazardous waste label on that container. Store them in a way that ensures the containers can be closed. Submit evidence of completion to Env. Health by the comply by date.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 64357
Site Name: SAN BRUNO TRANSFER STATION
Violation Date: 05-06-2022
Citation: 40 CFR 1 265.177 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.177
Violation Description: Failure to separate incompatible wastes from the same container, nearby containers, or unwashed containers which previously contained incompatible waste or materials.
Violation Notes: Returned to compliance on 06/03/2022. OBSERVATION: It was not clear that flammable products are being segregated from materials such as oxidizers or other incompatibles. Totes observed in the flammable locker included aerosols, petroleum products, and Z-lex carpet stain eliminator (no SDS found), and Schultz expert plan food. REQUIRED ACTION: Provide the facility procedures for waste segregation in storage when hazardous wastes are identified during load check or otherwise found on the site. Waste segregation procedures may include training, postings, and the use of separate labeled containers. Submit a picture and a response to Env. Health by the comply by date.

City,State,Zip: SAN BRUNO, CA 94066
Site ID: 64357
CERS ID: 10066522
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 64357
Site Name: SAN BRUNO TRANSFER STATION
Violation Date: 02-19-2020
Citation: 22 CCR 16 66266.81(a)(4)(B) - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.81(a)(4)(B)
Violation Description: Failure to retain for at least three years a legible copy of each manifest or bill of lading which identifies spent lead-acid storage batteries shipped to a person who stores the batteries or who uses, reuses, recycles or reclaims the batteries or their components.
Violation Notes: Returned to compliance on 02/19/2020. OBSERVATION: During the inspection, the disposal records for spent lead acid batteries was not provided. During the inspection, the employees confirmed that more than 10 spent lead acid batteries are year are taken to interstate battery for proper disposal/recycling. During the inspection, the employees agreed to maintain disposal records for spent lead acid batteries for three years. CORRECTIVE ACTION: Continue to ensure that disposal records for spent lead acid batteries are maintained for three years.
Violation Division: San Mateo County Environmental Health

Site ID:	64357
Site Name:	SAN BRUNO TRANSFER STATION
Violation Date:	12-18-2014
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 02/20/2015. Load check and other materials in lockers unlabeled. See attachments.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	64357
Site Name:	SAN BRUNO TRANSFER STATION
Violation Date:	05-06-2022
Citation:	22 CCR 16 66266.81(a)(4)(B) - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.81(a)(4)(B)
Violation Description:	Failure to retain for at least three years a legible copy of each manifest or bill of lading which identifies spent lead-acid storage batteries shipped to a person who stores the batteries or who uses, reuses, recycles or reclaims the batteries or their components.
Violation Notes:	Returned to compliance on 06/10/2022. OBSERVATION: Records for recent lead-acid battery pick-ups/drop-offs at Interstate Batteries were not available during the inspection. They were recorded in the prior year binder. The facility typically collects more than 10 batteries per year and multiple-levels of batteries were observed stored on a pallet in the storage locker. It is not clear if the facility stores 1 ton or more of batteries and how long they have been stored on site. No leaking batteries observed. REQUIRED ACTION: Submit a bill of lading for transporting lead-acid batteries to Env. Health by 5/20/22.

Eval Notes: Received the following message: Hi Aris I updated the HMBP based on your comment. Will submit a revised certified plan early next week after I review the rest of the document. Thanks, Chris Christopher J. Gibson Group Environmental Manager - South Group Recology | 1675 Rogers Avenue | San Jose, CA 95112 T: 408.961.1242 | C: 415.286.3523 cgibson@recology.com HMBP submittal reviewed and not accepted with the following comment: HHW Loadcheck Waste (solids) volume should be changed to pounds . So if the physical state is solid, then volume of unit must be pounds. If physical state is liquid, then volume of unit must be gallons. Please update and resubmit. Thank you.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Quarterly Update: International Paint Company (IPC) operated as a solvent-based paint manufacturer from 1947-1986. They submitted a Part A on 11/19/1980 and was granted an ISD on 4/6/1981. IPC later requested a reclassification on 1/23/1986 for their facility explaining that their activities classify them as a generator and not a TSDF. Their reclassification was accepted by DTSC on 3/19/1986.

Description:	RP states 30 gallons of Masterset AC 534(chemical to set cement quickly) was spilled. How the spill occurred, and what type of surface it is on is unknown at this time. He stated no waterways or storm drains have been impacted. A contractor has been hired and enroute to clean up the site. RP states he will provide an update as more information becomes available.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Extracted from URS's June 26, 2009 Work Plan for Additional On-Site Source Area Assessment and Off-Site Monitoring Well Installation, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The intersection of El Camino Real and San Bruno Avenue has been the location of retail gasoline service stations for more than 50 years. The northeast corner of the intersection is presently occupied by a Valero gasoline service station. An ExxonMobil station previously occupied this address. Petroleum hydrocarbon impacted soil and groundwater were discovered beneath the site in 1988; A groundwater extraction system was installed on the site and operated from 1991 to 1996. Approximately 67 pounds of petroleum hydrocarbons and 1,300,759 gallons of groundwater were removed from 1991 to 1996; Four 10,000-gallon fuel USTs and one 550-gallon waste oil UST were installed in 1982 and removed in 1997; Four 550-gallon fuel USTs were discovered and removed during the 1997 UST excavation activities. The USTs were of an unknown age, but are assumed to have been originally installed in about 1945; Approximately 2,800 tons of soil was removed from beneath the site during the 1997 UST excavation activities; and Quarterly groundwater monitoring has occurred at the site from 1993 until 2001. Semiannual groundwater monitoring has occurred at the site since the first quarter of 2002 to present. Source areas at the former ExxonMobil station site include the former central and southern UST basins and the former dispenser islands. At the former ExxonMobil site, remedial pilot studies included high vacuum dual phase extraction (HVDPE), soil vapor extraction (SVE), air sparging (AS) and biosparging.The HVDPE, SVE, AS and biosparging pilot test results at the former Exxon station indicated the movement of air through the subsurface (both sparging and vapor extracting) could potentially reduce residual contaminant mass in the hot spot areas at these two sites. However, pilot testing also suggests that the complex/variable nature and geometry of unconsolidated materials beneath the Site appears to create preferential pathways for air and contaminant movement, thereby limiting the effectiveness of physical contaminant mass recovery/removal. On June 30, 2004, ERI installed and collected soil vapor samples from sampling points SV-1, SV-2, SV-3, SV-4 and SV-6 at the former ExxonMobil site. During installation, pea gravel was observed at soil vapor point SV-5. Due to safety concerns with encountering underground piping/equipment, installation of soil vapor sampling point SV-5 was not completed. Tracer gas was detected in soil vapor samples SV-1, SV-2, SV-3, SV-4 and SV-6. Due to soil vapor sample collection from low permeability clayey soils and the use of 5-L Summa canisters, ERI concluded that a leak likely occurred at the well seal tubing interface. Based on the data collected, ERI

EXXON CO U.S.A. 7-2059 (Continued) **S100178951**

determined that the soil vapor samples collected from SV-3 were valid (ATC, 2007a). On September 24, 2004, ERI collected soil vapor samples from sampling points SV-2 and SV-3 using a custom made sampling manifold connected to a flow regulator, pressure gauges and a 1-L Summa canister. Gauze strips soaked in isopropyl alcohol (tracer gas) were wrapped around the well head sampling valve while collecting soil vapor samples from soil vapor points SV-2 and SV-3. Because tracer gas was detected above acceptable limits, the results of soil vapor sampling conducted in September 2004 utilizing soil vapor points SV-2 and SV-3 were not representative of soil vapor conditions beneath the Site. ERI concluded that due to the low permeability of the native soils, the soil vapor points short circuit at the well seal before sufficient vacuum is generated to extract soil vapor from the native material. On September 4, 2007, ATC conducted soil vapor assessment activities at the former ExxonMobil station. As previously mentioned, potential sources on the former ExxonMobil site include two former UST systems in use before 1997 and the current UST system that was installed in 1997. Based on the laboratory analytical results reported during this soil vapor assessment, all concentrations of detected VOCs in the soil vapor samples were below the Shallow Soil Gas Screening Levels for Evaluation of Potential Vapor Intrusion Concerns (volatile chemicals only), Table E-2 (RWCQB, 2008) and do not pose a human health risk. The geometry of fuel hydrocarbon impacts at the source areas (former dispenser islands, former southern UST basin, and former central UST basin) has been defined by the qualitative and quantitative work conducted to date. The geologic setting at the site appears to create preferential pathways for air and contaminant movement. The upper five feet of soil at the site consists of clayey soils which may act as a natural cap/barrier to volatilization and vertical contaminant migration. However, these conditions could accentuate the effect of preferential pathways, such as utility corridors.

SAN MATEO CO. LUST:

Name:	UNOCAL #6980 (FORMER)
Address:	192 EL CAMINO REAL
City,State,Zip:	SOUTH SAN FRANCISCO, CA
Region:	SAN MATEO
Facility ID:	550098
Facility Status:	5C- Pollution Characterization
Global ID:	T0608100577
APN Number:	014183110
Case Type:	SOUTH SAN FRANCISCO, CA
EDR Link ID:	SOUTH SAN FRANCISCO, CA

LUST:

Name:	UNOCAL #6980 (FORMER)
Address:	192 EL CAMINO REAL
City,State,Zip:	SOUTH SAN FRANCISCO, CA 94080
Lead Agency:	SAN MATEO COUNTY LOP
Case Type:	LUST Cleanup Site

Geo Track:

Global Id:	T0608100577
Latitude:	37.6423653510372
Longitude:	-122.424336969852
Status:	Open - Verification Monitoring
Status Date:	06/02/2022
Case Worker:	JM
RB Case Number:	41-0605
Local Agency:	SAN MATEO COUNTY LOP
File Location:	Local Agency
Local Case Number:	550098
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
EPA Region:	9
Coordinate Source:	Google Map Move
Cuf Case:	NO
Quantity Released Gallons:	Not reported
Begin Date:	04/08/1992
Leak Reported Date:	04/13/1992
How Discovered:	Tank Closure
How Discovered Description:	Not reported
Discharge Source:	Piping, Tank
Discharge Cause:	Unknown
Stop Method:	Close and Remove Tank, Other Means
Stop Description:	Removed USTs and piping

UNOCAL #6980 (FORMER) (Continued) **1000167401**

No Further Action Date:	Not reported
CA Water Watershed Name:	South Bay - San Mateo Bayside (204.40)

Address:	801 EL CAMINO REAL
City,State,Zip:	SAN BRUNO, CA 94066
Lead Agency:	SAN MATEO COUNTY LOP
Case Type:	LUST Cleanup Site

Geo Track:

Global Id:	T0608100147
Latitude:	37.628924504
Longitude:	-122.41708418
Status:	Completed - Case Closed
Status Date:	10/23/2018
Case Worker:	JM
RB Case Number:	41-0155
Local Agency:	SAN MATEO COUNTY LOP
File Location:	Local Agency
Local Case Number:	880006
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern:	Benzene, Gasoline
EPA Region:	9
Coordinate Source:	Manual Entry on Screens
Cuf Case:	NO
Quantity Released Gallons:	0
Begin Date:	10/06/1987
Leak Reported Date:	10/06/1987
How Discovered:	Tank Closure
How Discovered Description:	Not reported
Discharge Source:	Not reported
Discharge Cause:	Not reported
Stop Method:	Close and Remove Tank
Stop Description:	Not reported
No Further Action Date:	10/23/2018
CA Water Watershed Name:	South Bay - San Mateo Bayside (204.40)
Dwr Groundwater Subbasin Name:	Westside (2-035)
Disadvantaged Community:	Not reported
CA Enviroscreen 3 Score:	51-55%
CA Enviroscreen 4 Score:	50-55%

92759 (Continued) **U001594624**

Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)
Site History: Extracted from URS's June 26, 2009 Work Plan for Additional On-Site Source Area Assessment and Off-Site Monitoring Well Installation, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The intersection of El Camino Real and San Bruno Avenue has been the location of retail gasoline service stations for more than 50 years. The northwest corner of the intersection is currently occupied by SpeeDee Lube, an auto service establishment. A Chevron station previously occupied this address. Petroleum hydrocarbon impacted soil and groundwater were discovered beneath the site during the demolition of the former Chevron station in 1987; All known USTs were removed in 1988. An undocumented amount of soil was excavated during the UST removals; A groundwater extraction and treatment system operated from 1991 until 1996. During this time, approximately 341 pounds of fuel hydrocarbons and 2,094,156 gallons of groundwater were removed from the site; and Quarterly groundwater monitoring has occurred at the site from 1989 until 2001. Semiannual groundwater monitoring has occurred at the site since the first quarter of 2002 to present. Source areas at the former Chevron Station site include the former UST basin and the former waste oil UST basin. At the former Chevron location, a surfactant injection/extraction test was conducted. The results of the surfactant injection at the former Chevron facility indicated the mass in close proximity to the former extraction wells (E-1 and E-2) could be mobilized for subsequent treatment (either vacuum truck removal or in-situ treatment). However, for the geologic reasons noted for the former Exxon station and the Shell station, the surfactant injection/extraction pilot tests also may create pockets of residual contaminant mass and potential preferential pathways for the air and contaminant movement, thereby limiting the effectiveness of physical contaminant mass recovery/removal. On June 19 and 26, 2002, Cambria Environmental Technology, Inc. advanced two soil vapor borings using a 4-inch outer diameter hand auger at the former Chevron station. The purpose of the investigation was to evaluate benzene inhalation risk from dissolved-phase benzene concentrations in monitoring well E-2 located on the east of the property (Cambria, 2002). The two borings were placed in the vicinity of the former dispenser islands and former UST cavity. Based on the laboratory analytical results collected from the two soil vapor borings, benzene in sample VSB2@6 with a concentration of 5,600 8g/m3 was the only sample that exceeded the current commercial ESL of 280 8g/m3 presented in Shallow Soil Gas Screening Levels for Evaluation of Potential Vapor Intrusion Concerns (volatile chemicals only), Table E-2 (RWCQB, 2008)2. To further assess this exceedance, additional soil, soil vapor and groundwater sampling is proposed in this area.

Violation Date: 07-13-2017
Citation: HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1
Violation Description: Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.
Violation Notes: Returned to compliance on 12/22/2017. Notify property owner that facility is subject to HMBP reporting requirement.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 155778
Site Name: SPEEDEE OIL LUBE & TUNE UP
Violation Date: 05-31-2022
Citation: 22 CCR 15 66265.53 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.53
Violation Description: Failure to maintain a copy of the contingency plan and all its revisions at the facility and to submit a copy to all local police departments, fire departments, hospitals, and State and local emergency response teams that may be called upon to provide emergency services.
Violation Notes: Returned to compliance on 06/08/2022. OBSERVATION: Facility could not demonstrated that a copy of the contingency plan was maintained at the facility. REQUIRED ACTION: Provide evidence to the inspector that a copy of the facility contingency plan is maintained onsite.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 155778
Site Name: SPEEDEE OIL LUBE & TUNE UP
Violation Date: 05-03-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to label stationary hazardous waste tanks as "hazardous waste" and mark with an accumulation start date.
Violation Notes: Returned to compliance on 05/03/2019. OBSERVATION: Used oil tank lacked a current accumulation start date. During the inspection, the current accumulation start date was added. CORRECTIVE ACTION: Continue to ensure that all containers and tanks of hazardous waste are properly labeled.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 155778
Site Name: SPEEDEE OIL LUBE & TUNE UP
Violation Date: 06-08-2023
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure of generator to obtain assessment or reassessment every five

92759 (Continued) **U001594624**

(5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.

Violation Notes: OBSERVATION: The certification and engineering assessment exemption for the waste oil tank expired 5/31/22. REQUIRED ACTION: Either have a written hazardous waste tank assessment conducted by a Professional Engineer, or obtain another 3 year exemption with sign off from your CUPA inspector, and the local Fire Marshal. A template of the form will be provided to you with this inspection report, however, please note that you do not currently meeting the minimum criteria for the exemption with an open violation for failure to conduct/document the daily hazardous waste tank inspections. If you wish to use this exemption again, address the open inspection violation and follow up with your inspector to receive sign off on the exemption form.

facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 06/08/2022. OBSERVATION: Facility was unable to provide hazardous waste training documentation. This violation was also cited during the last inspection and never resolved. REQUIRED ACTION: Provide documentation to the inspector showing that all staff have received hazardous waste training within the last year. Additionally you are required to maintain documentation that lists: -the job title for each position at the facility related to hazardous waste management, and the name of the employee(s) filling each position; -a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position. Provide copies of this information to the inspector as well.

Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 05/05/2021. OBSERVATION: There are three approximately 5 gallon containers near the hazardous waste tank for paper filters, metal filters, and and oil collected while draining crushed filters. These containers are not closed, and the red containers have been altered so they cannot be closed. REQUIRED ACTION: All containers of hazardous waste need to be maintained closed except when adding or removing waste. Submit documentation to the inspector showing that these containers have been replaced/closed when not actively having hazardous waste added to them.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Extracted from ERI's July 29, 2009 Remedial Action Work Plan, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. Former Exxon Service Station 70107 is located at 310 East San Bruno Avenue in San Bruno, California. The site existed as a gasoline service station as early as 1965. Wickland Oil Company acquired the site from Aminoil U.S.A. in 1982. ExxonMobil purchased the property in 1988 from Wickland Oil Company. Property ownership was transferred from ExxonMobil to Valero Energy Corporation (Valero) in June 2000. The site is currently operated as a Valero-branded gasoline service station by an independent dealer. The site is located approximately 1 mile west of the San Francisco Bay on the southeastern corner of 2nd Avenue and East San Bruno Avenue in San Bruno, California. The site lies at an elevation of approximately 15 feet above msl. Properties in the vicinity of the site are occupied by commercial and residential developments. Former uses of surrounding commercial properties include a radio tube manufacturing plant and a machine shop. Currently there are seven groundwater monitoring wells (MWI, MW2A, MW3, MW4, MW6, MW16, and 2" Well), two piezometers (PZI and PZ2), three groundwater extraction wells (EWI, EW2A, and EW3), and four soil vapor sampling wells (SVI through SV3 and SV6) at the subject site. There are four groundwater monitoring wells in the surrounding streets (MW8 through MWlO and MW12), one groundwater monitoring well on the property west of the subject site (MW7A), one groundwater monitoring well on a property north of the site (MWII), and three groundwater monitoring wells on properties southeast of the site (MW13 through MW15). There are 12 additional soil vapor sampling wells located in the surrounding streets and adjacent properties. Groundwater Technology, I nc. (GTI) replaced three single-walled steel USTs with three double-walled steel USTs in December 1986. The three double-walled USTs installed in 1986 are of 10,000-gallon capacity. From September through December 1991, Harding Lawson Associates (HLA) observed demolition of the station building, construction of a new station building, and removal and replacement of product lines. Dispensers may have been replaced in 1994. Multiple phases of assessment have been conducted from 1986 to present, including the advancement of soil borings B1 through B7 and DPI through DP10, the advancement of Hydropunch@type borings HPI through HP5, the installation of monitoring wells MW1 through MW16, 2" Well, and piezometer wells PZ1 and PZ2, the installation of extraction

SAN BRUNO VALERO (Continued) **S109285537**

wells EW1 through EW3 and EW2A, the installation of soil vapor sampling wells SV1 through SV16, and the collection of soil samples from the UST removal excavation, remedial excavation sidewalls, product line replacement trenches, and dispenser replacement excavations. Additionally, an undisturbed sediment sample from vadose sediment was collected for analyses of physical soil properties. Results of assessment activities indicate that constituents of concern include TPHg, benzene, and MTBE. Additional details of environmental assessment activities are summarized in ERI's Site Conceptual Model dated May 17, 2005, and in ERI's Second Update to Site Conceptual Model; Evaluation of Remedial Alternatives and Clean-Up Goals; and Evaluation of Remedial Feasibility Studies dated December 14, 2007. Groundwater monitoring began at the site in December 1986 (2-inch well only); quarterly monitoring was initiated in June 1989. ERI began quarterly groundwater monitoring in first quarter 1999. Semi-annual sampling was initiated prior to the fourth quarter sampling event in 2003. GTI excavated soil containing hydrocarbons from the tank pit during UST replacement in December 1986. From September through December 1991, HLA observed station reconstruction that included demolition of the station building, construction of a new station building, and remedial excavation off approximately 800 cubic yards of soil. Soil samples 1 through 8 were collected from the sidewalls and the bottom of the remedial excavation within the footprint of the new station building. Approximately 100 cubic yards of soil were removed from beneath former product lines. Soil samples 9 through 15 were collected from the floor of the excavated product line trenches. Between September and December 1991, HLA constructed a groundwater recovery trench along the southern property boundary, and installed extraction well (EWI) and two piezometers (PZI and PZ2) in the trench backfill. RESNA Industries constructed the above-grade components of the GWPTS, and operated the GWPTS from November 1993 through January 1994. The GWPTS was shut down in January 1994 due to elevated levels of MTBE in effluent water samples. In June 1995, EA added 750-pound carbon vessels to treat MTBE and restarted the system. In November 1995, EA shut the system down to evaluate the need for installation of additional extraction wells (EA, 1996; ERI, 1999). EA operated the GWPTS intermittently and sampled it monthly from 1995 through 1999. ERI restarted the GWPTS in May 1999 and operated it continuously through July 2002, and also installed additional groundwater extraction wells in April 2001. In July 2002, ERI shut down GWPTS to evaluate a flash point exceedence. ERI installed a methane stripper in August 2003, restarted the system, and operated it briefly before shutting it down in September 2003 due to low influent concentrations. ERI performed a DPE test in December 2008. DPE resulted in the removal of 140 gallons of water from well MW2A and 2,290 gallons of water from well EW2A. Based on the data collected during the DPE feasibility testing, vapor extraction resulted in the removal of approximately 32.6 pounds of TPHg and 0.32 pound of benzene from well MW2A. During vapor extraction on well EW2A, approximately 9.0 pounds of TPHg and 0.07 pound of benzene were removed. Details of the test are summarized in ERI's Dual-Phase Extraction Feasibility Test report dated February 26, 2009. ERI concluded that DPE is a feasible method for remediation of residual, vapor-phase, and dissolved-phase hydrocarbons in soil and groundwater within the upper clayey sand unit within the source area near the tested wells and recommended implementation of DPE at the site. The

SAN BRUNO VALERO (Continued) **S109285537**

County approved this recommendation in their April 30, 2009, letter.

Alternate Address:	120 SOUTH LINDEN
Alternate City,St,Zip:	S SAN FRANCISCO, CA 94080
Background Info:	The Site is bounded to the north by Victory Avenue, to the south by Tanforan Avenue, to the east by railroad tracks, and to the west by South Maple Avenue. The site is comprised of a building and a warehouse, which is used for automotive storage. Areas around the buildings are paved or landscaped. The site is located in an industrial area and is adjacent to a tire company. Joseph W. Welch & Investors purchased the site in 1984. The site is now zoned for light industrial use. The property is currently occupied by a number of different tenants, including music studios, auto repair shops and restoration facilities. The Reichold Chemical site is a registered historical landmark by San Mateo County. From 1937 to 1984, Reichhold Chemicals Inc. owned and operated the site. Reichold manufactured paint products using emulsion, phenol, alkyd, and urea resins.
Comments Date:	01161981

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker,

CA Enviroscreen 4 Score:	75-80%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Extracted from URS's June 26, 2009 Work Plan for Additional On-Site Source Area Assessment and Off-Site Monitoring Well Installation, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The intersection of El Camino Real and San Bruno Avenue has been the location of retail gasoline service stations for more than 50 years.The southeast corner of the intersection is occupied by a Shell retail petroleum station. Petroleum hydrocarbon impacted soil and groundwater were first discovered in 1986; Three underground storage tanks (USTs) and one waste oil UST were removed in 1988; Approximately 550 cubic yards of soil was excavated from beneath the site in 1988; A groundwater extraction system was installed and operational on the site from 1993 to 1996. Approximately 10.7 pounds of fuel hydrocarbons was removed and 520,000 gallons of groundwater were pumped from 1993 to 1996; Approximately 80 cubic yards of soil was excavated from beneath the site in 2002; and Quarterly groundwater monitoring has occurred at the site from 1991 until 2001. Semiannual groundwater monitoring has occurred at the site since the first quarter of 2002 to present. Petroleum hydrocarbon impacts were initially detected in 1986 at the Shell station. Approximately 550 cubic yards of soil and 520,000 gallons of groundwater (calculated petroleum hydrocarbon mass of 10.7 pounds) have been removed and treated at the Shell site. Source areas at the Shell Station site include a former UST basin located at the northeastern portion of the property and the northern and western dispenser islands. At the Shell-branded site, HVDPE, SVE, and AS feasibility studies were conducted. HVDPE, SVE, and AS pilot test results at the Shell station indicated the movement of air through the subsurface (both sparging and vapor extracting) could potentially reduce residual contaminant mass in the hot spot areas at these two sites. However, pilot testing also suggests that the complex/variable nature and geometry of unconsolidated materials beneath the Site appears to create preferential pathways for air and contaminant movement, thereby limiting the effectiveness of physical contaminant mass recovery/removal. Two SVE pilot studies were completed at the Shell station. The first pilot study was completed on August 2, 1990 under the direction of Applied GeoSystems (1990). This pilot study included the collection of soil vapor from three wells: MW-3, MW-4 and MW-5. Soil vapor samples for laboratory analyses were collected

SAN BRUNO SHELL (Continued) **U001594655**

in Tedlar bags. The vapor samples with high organic vapor monitor (OVM) readings were selected for laboratory analysis. The results of this pilot study indicated elevated soil vapor concentrations of TPH-g and benzene. A second pilot test was completed by ATC (2007b) as described previously in Section 3.4, Pilot Study Results. Pilot test results indicated the movement of air through the subsurface (both sparging and vapor extracting) could potentially reduce residual contaminant mass in the hot spot areas at the Shell site sufficiently to achieve site closure. However, pilot testing suggests that the complex/variable nature and geometry of unconsolidated materials beneath the site appears to create preferential pathways for air and contaminant movement, thereby limiting the effectiveness of physical contaminant mass recovery/removal (ATC, 2007b). A review of previous investigations by URS as part of the preparation of this Work Plan did not indicate that any discrete soil vapor samples have been collected from the Shell station. Because the soil vapor samples submitted for laboratory analysis from the previous two pilot studies were collected at high vacuum pressures and over various time periods, these reported concentrations cannot be directly compared to Shallow Soil Gas Screening Levels for Evaluation of Potential Vapor Intrusion Concerns (volatilechemicals only), Table E-2, (RWCQB, 2008). The geometry of fuel hydrocarbon impacts at the source areas (former UST basin, former northern dispenser island, and former western dispenser island) have been defined and are limited to the area beneath such sources and the downgradient smear zone along the water table. However, the western dispenser island does not appear to be a significant source of dissolved phase impact at the site. Pilot testing suggests that the complex/variable nature and geometry of unconsolidated materials beneath the site appears to create preferential pathways for air and contaminant movement.

Violation Description:	"Failure to submit a copy of the overfill prevention equipment inspection results on the Overfill Prevention Equipment Inspection Report Form to the UPA within 30 days after the inspection. "
Violation Notes:	Returned to compliance on 11/11/2019. OBSERVATION: On and after October 1, 2018, all overfill prevention equipment used to comply with

SAN BRUNO SHELL (Continued) **U001594655**

California Code of Regulations, title 23, division 3, chapter 16,1 section 2635(c)(1) must be inspected periodically and after repairs. For USTs installed before October 1, 2018, the first inspection must be completed by October 13, 2018. The SMC CUPA should have received a copy of the Overfill Prevention Equipment Inspection Report Form within 30 days of 10-1-18. The SMC CUPA has not received a copy of the Overfill Prevention Equipment Inspection Report Form for this facility. CORRECTIVE ACTION: Immediately provide a 48 hour notice to the SMC CUPA for the overfill prevention inspection. Within 30 days of the inspection, submit a copy of the overfill prevention equipment inspection results on the Overfill Prevention Equipment Inspection Report Form to the SMC CUPA.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 150332
Site Name: San Bruno Shell #173
Violation Date: 06-06-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 11/11/2019. OBSERVATION: On and after October 1, 2018, all overfill prevention equipment used to comply with California Code of Regulations, title 23, division 3, chapter 16,1 section 2635(c)(1) must be inspected periodically and after repairs. For USTs installed before October 1, 2018, the first inspection must be completed by October 13, 2018. The SMC CUPA does not have a record of this being scheduled or completed. CORRECTIVE ACTION: Immediately provide a 48 hour notice to the SMC CUPA for the overfill prevention inspection.

Violation Date: 06-07-2022
Citation: 23 CCR 16 2715(c)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(2)
Violation Description: Failure to have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO).
Violation Notes: Returned to compliance on 09/13/2022. OBSERVATION: There were no staff onsite at the time of the inspection who had received UST training. Casheir Jose Menjivar stated he had been with the company for 5 months and had not received training. He was unfamiliar with critical safety aspects of the station, including the location or function of the emergency shut off. REQUIRED ACTION: Perform initial training, and annual refreshers for all employees who have not received it. Ensure that there is always at least one trained employee present at the station. Provide updated training records to the inspector.

Violation Date: 06-03-2021
Citation: 23 CCR 16 2716(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(f)
Violation Description: Failure to maintain on-site, or off-site at a readily available location if approved by the UPA, copies of Designated Operator inspection records as follows: Designated operator monthly inspection records for inspections performed before October 1, 2018 must be kept for 12 months from the month of inspection. For inspections performed on or after October 1, 2018, copies of the "Designated Underground Storage Tank Operator Visual Inspection Report" must be kept for 36 months from the month of inspection.
Violation Notes: Returned to compliance on 06/29/2021. OBSERVATION: There was no DO visual inspection report on file at the facility between 9/2/20 and 10/28/20. REQUIRED ACTION: If an inspection was conducted during this time, provide a copy of the report to the inspector, and ensure that

SAN BRUNO SHELL (Continued) **U001594655**

it is maintained onsite. If there was not an inspection conducted, ensure that steps are taken so that DO reports take place every 30 days going forward.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 150332
Site Name: San Bruno Shell #173
Violation Date: 06-07-2018
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).
Violation Notes: Returned to compliance on 03/05/2019. OBSERVATION: D.O. reports January through May of 2018 list the SB989 test as 1-12-15. It should be listed as 12-18-17. CORRECTIVE ACTION: Ensure that designated operators performing monthly inspections at this facility are including all of the required information on the reports. Within 30 days, submit to the SMC CUPA a copy of the correctly completed June 2018 D.O. report.

Site ID: 150332
Site Name: San Bruno Shell #173
Violation Date: 06-03-2021
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 06/29/2021. OBSERVATION: Training records for all applicable employees were not available at the time of the inspection. Only UST specific training records were available onsite at time of inspection. REQUIRED ACTION: Perform safety training for all employees, at a minimum including emergency response plans and procedures in the event of a release or threatened release of a hazardous material, notification procedures of appropriate parties and emergency response personnel, procedures for mitigation of a release or threatened release, and evacuation plans and procedures for the business site. Submit documentation to the Inspector demonstrating that all employees have received training. Ensure that initial and annual refresher training records for all employees are retained for a minimum of three years.

Site Name: San Bruno Shell #173
Violation Date: 06-22-2015
Citation: HSC 6.7 25291 - California Health and Safety Code, Chapter 6.7, Section(s) 25291
Violation Description: Failure to maintain under-dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid.
Violation Notes: Returned to compliance on 07/22/2015. Minor condensation in STP, TLM, and fill sumps should be mopped up. UDCs have liquid that appears to be fuel. These should be cleaned, checked for leaks, repaired if any leaks are present, and maintained in clean and dry condition.
Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 150332
Site Name: San Bruno Shell #173
Violation Date: 06-07-2018
Citation: HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 07/05/2018. OBSERVATION: UST tank information is not current in CERS. Diesel, 87, and 91 vent secondary containment should be marked as fiberglass. Diesel, 87, and 91 Vent piping transition sump information should be left blank or none. CORRECTIVE ACTION: Immediately update the required information in CERS. Within 30 days submit the updated tank information for review by the CUPA at https://cers.calepa.ca.gov/

Violation Date: 06-15-2023
Citation: 23 CCR 16 2716(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(f)
Violation Description: Failure to maintain on-site, or off-site at a readily available location if approved by the UPA, copies of Designated Operator inspection records as follows: Designated operator monthly inspection records for inspections performed before October 1, 2018 must be kept for 12 months from the month of inspection. For inspections performed on or after October 1, 2018, copies of the "Designated Underground Storage Tank Operator Visual Inspection Report" must be kept for 36 months from the month of inspection.
Violation Notes: Returned to compliance on 06/23/2023. OBSERVATION: There was not a DO inspection for October 2022 available on-site. There were DO inspections completed on 9/30/22 and 11/23/2022; however, it's unclear if an inspection was completed in October. CORRECTIVE ACTION: Submit a copy of the October 2022 DO inspection report to the CUPA by the comply by date. In the event an inspection was not completed in

SAN BRUNO SHELL (Continued) **U001594655**

October 2022, please submit a statement indicating why the inspection was not completed and the steps the facility has/will take to ensure inspections are completed moving forward.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

LOWRIE PAVING (Continued) **1001265148**

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
