RESOLUTION NO. 2021 – XX

RESOLUTION INITIATING PROCEEDINGS TO ESTABLISH A REVISED STORM DRAINAGE AND FLOOD PROTECTION FEE

WHEREAS, Health & Safety Code Section 5471 authorizes the City Council to establish fees for services and facilities furnished by the City in connection with its storm drainage system; and

WHEREAS, the City's storm drainage system is designed to accept runoff from developed parcels and discharge that runoff in a safe and controlled manner that reduces flooding; and

WHEREAS, the City's storm drainage system is aging and, without substantial increased maintenance and the replacement of pipes and other system elements, faces an increased risk of pipe failures; and

WHEREAS, staff recommends that the bulk of the current system be replaced over a 10-15 year period; and

WHEREAS, the cost of these replacements is estimated to be $22.9 Million; and

WHEREAS, the community's health, safety, and well-being would be well served by implementing system improvements to accommodate a 25-year storm event as outlined in the 2014 Storm Master Plan prepared by GHD Engineering; and

WHEREAS, another $31 Million in improvements is estimated to be necessary for capacity improvements to accommodate a 25-year storm event; and

WHEREAS, the storm drainage system must comply with water quality regulations that protect the long-term health and safety of San Bruno Channel and San Francisco Bay; and

WHEREAS, the City's current stormwater fee which has been in place since 1994 is insufficient to fund the costs of these improvements and the maintenance and operation of the system; and

WHEREAS, the City has engaged Willdan, a consultant, to develop and recommend a new, annual stormwater fee that would replace the existing fee and would support repairs and upgrades that mitigate local flooding and comply with environmental requirements; and

WHEREAS, the proposed fee would be collected annually on the property tax roll; and

WHEREAS, the rate structure of the proposed fee has been designed so that each parcel of real property pays a fee that is proportional to that parcel's contribution of stormwater to the drainage system; and

WHEREAS, without the fee, the General Fund, already under fiscal stress, would need to continue to provide required funding; and

WHEREAS, continued General Fund subsidies endanger other key public services like public safety and street, park, and facilities maintenance; and

WHEREAS, in order to adequately fund the Stormwater system over time, it is recommended that the fee escalate annually by up to the Consumer Price Index (CPI); and

WHEREAS, Article XIII D, Section 6 of the California Constitution, a part of Proposition 218, requires that the City hold a protest hearing and an election before the City Council can impose the proposed fee; and

WHEREAS, the City Council desires to initiate proceedings to impose the proposed fee.

NOW THEREFORE, BE IT RESOLVED, BY THE CITY COUNCIL OF THE CITY OF SAN BRUNO, CALIFORNIA, AS FOLLOWS:

1. The foregoing recitals were reviewed are true and correct.

2. The time and place for a public hearing on the fee described in Exhibit "A", attached hereto, and incorporated herein by reference, is March 23, 2021 at 7:00 p.m., or soon thereafter, during a virtual meeting of the City Council. Details for the virtual meeting, including a Zoom link for the meeting will be published on the March 23, 2021 meeting agenda.

3. The public hearing will be conducted in the manner set forth in Article XIII D, Section 6(a) of the California Constitution. The City will accept written protests against the proposed fee in connection with the public hearing and will hear written and oral testimony from any interested person at the hearing. The City hereby adopts the guidelines set forth in Exhibit "B", attached hereto, to govern the acceptance and tabulation of written protests.

4. City Staff is authorized to give notice of the public hearing as required by law.

5. The City Clerk is hereby authorized to do all things necessary and proper to implement the provisions of this Resolution, including certifying the passage and adoption of this Resolution and entering it into the book of original Resolutions.

---oOo---

I hereby certify that foregoing **Resolution No. 2021 - XX**
was introduced and adopted by the San Bruno City Council at a regular meeting on January 12, 2021, by the following vote:

AYES: Councilmembers:

NOES: Councilmembers:

ABSENT: Councilmembers:

_____
Melissa Thurman, CMC
City Clerk

Exhibit A

STORM DRAINAGE AND FLOOD PROTECTION FEE

Rate Structure

The rate of the annual Storm Drainage and Flood Protection Fee is:

$0.0498859 per sq. ft. of Impervious Area

The Impervious Area of a parcel is the portion of the parcel that is covered by a rooftop, a walkway, a patio, a driveway, a parking lot, a storage area, concrete or asphalt paving, gravel roads, or any other hard surface area that either prevents or retards the entry of water into the soil mantle or causes water to run off the surface in greater quantities or at an increased rate of flow.

In order to keep pace with inflation, this fee will be subject to annual adjustments based on the San Francisco Bay Area Construction Cost Index (CCI) as published by Engineering News Record (ENR).

For administrative convenience, the impervious surface of a parcel is presumed to consist of the following percentage of the total square footage of the parcel, based on the zoning of the parcel:

Zoning*	Zoning Definition**	Estimated PIF***
R-1	Single-Family Residential	60%
R-2	Low Density Residential	70%
R-3	Medium Density Residential	85%
R-4	High Density Residential	85%
C	General Commercial	90%
C-B-D	Central Business District	95%
C-M	Commercial Manufacturing	95%
C-N	Neighborhood Commercial	95%
C-O	Community Office	90%
A-R	Administrative and Research	90%
M-1	Industrial	95%
O	Open Space/Urban Parkland	10%
P-D	Planned Development	Varies
Undesignated	Undesignated	95%

Vacant, unimproved parcels that are still in their natural states are presumed to have no Impervious Surface Area.

The presumed Impervious Surface Area for each parcel in the P-D Zone was calculated by identifying the actual use of the parcel and using the PIF shown in the table above for that type of use. In certain cases, such as where a parcel was developed as a use other than the main use of property in their land use zone (for example a school in an open space zone) or a parcel is located in a subdivision developed in a manner that was atypical of development throughout the City for that zoning (for example a single family subdivision with very large parcels that are largely left in a natural state) the presumed Impervious Surface Area was adjusted based on actual development on the parcel or in the subdivision.

The City will establish an appeal process where a property owner may appeal the City's determination of the Impervious Surface Area of the property owner's parcel.

Exhibit B

STORM DRAINAGE AND FLOOD PROTECTION FEE

Guidelines for the Acceptance and Tabulation of Written Protests

SECTION 1: Definitions.

Unless the context plainly indicates another meaning was intended, the following definitions shall apply in construction of these guidelines.

A. "Parcel" means a County Assessor's parcel that is subject to the Proposed Fee.
B. "Proposed Fee" means the proposed Storm Drainage and Flood Protection Fee
C. "Record Owner" means the person or persons whose name or names appear on the County Assessor's last equalized assessment roll as the owner of a Parcel.
D. "Parcel Owner" means an owner of a Parcel.
E. "Tenant" means a tenant of a Parcel who is entitled to submit a protest pursuant to Section 53755 of the Government Code or is described in Article XIII D, Section 2(g) of the California Constitution,

SECTION 2: Notice.

A. The City shall give notice of the public hearing the Proposed Fee via U.S. mail to the Record Owner of each Parcel at the address shown on the last equalized assessment roll.

SECTION 3: Protest Submittal.

A. Written protests against the Proposed Fee may be submitted to the City Clerk by:
(i) Delivery to the Office of the City Clerk located at 567 El Camino Real, San Bruno, CA 94066 during published business hours; or
(ii) Mail addressed to the Office of the City Clerk at 567 El Camino Real, San Bruno, CA 94066 or
(iii) During the public hearing (which will be conducted remotely due to the COVID-19 emergency), protests may be deposited in the brown, metal drop box affixed to the north wall next to the Linden Avenue entrance to San Bruno City Hall, no later than the close of the public testimony portion of the public hearing.
B. Protests, including those submitted by mail, must be received by the City Clerk no later than the close of the public testimony portion of the public hearing.
C. The City cannot accept protests via fax or email.
D. The City welcomes all interested persons to comment orally at the public hearing. However, unless accompanied by a written protest, oral comments at the public hearing do not qualify as a formal protest,

SECTION 4: Protest Contents.

A. A written protest must include:
(i) A statement that it is a protest against the Proposed Fee.
(ii) The name of the parcel owner or tenant that is submitting the protest.
(iii) Identification of assessor's parcel number or street address of the Parcel with respect to which the protest is made.
(iv) The original signature and legibly printed name of the person submitting the protest (or, in the case of an owner who is a corporation or is otherwise not a natural person, the name of the owner submitting the protest, the legibly printed name and original signature of the person executing the protest on behalf of that owner, and an identification of the capacity in which that person executes the protest on behalf of the owner).
B. Written communications that do not include all of the elements set forth in Subdivision A of this Section will be treated as written comments on the proposal and entered into the record of the public hearing, but will not be counted as formal written protests.
C. If a protest is submitted in connection with a Parcel by a parcel owner or tenant who is not the Record Owner of the Parcel, then the person may attach evidence of ownership or tenancy to

the written protest. In connection with tabulation and verification of protests, the City reserves the right to request such evidence of ownership or tenancy from any such person. Such evidence, if requested by the City via a letter mailed prior to the announcement of the tabulation results, must be submitted to the City within ten days of the date the request is mailed in order for the protest to be valid.

D. If a protest is submitted by a parcel owner that is a corporation or that otherwise is not a natural person, the person executing the protest may attach evidence of the capacity in which he executes such protest. In connection with tabulation and verification of protests, the City reserves the right to request such evidence of such capacity from any such person. Such evidence, if requested by the City via a letter mailed prior to the announcement of the tabulation results, must be submitted to the City within ten days of the date the request is mailed in order for the protest to be valid.

SECTION 5: Protest Withdrawal.

Any person who submits a protest may withdraw it by submitting a written request that the protest be withdrawn. The withdrawal of a protest shall contain sufficient information to identify the affected parcel and the name of the person who submitted both the protest and the request that it be withdrawn.

SECTION 6: Multiple Protests.

A. Each parcel owner or tenant may submit a protest.

B. Only one protest will be counted per parcel as provided by Government Code Section 53755(b).

SECTION 7: Transparency, Confidentiality, and Disclosure.

A. Once a protest is opened, it becomes a disclosable public record, as required by state law and will be maintained in City files for two (2) years.

B. The City Clerk, or his or her designee, may commence the opening and tabulation of protests prior to public hearing.

SECTION 8: Determination of Validity.

The City Clerk, or his or her designee, shall not accept as valid any protest if he or she determines that any of the following is true:

A. The protest does not state its opposition to the Proposed Fee.

B. The protest does not identify a Parcel that would be subject to the Proposed Fee.

C. The protest does not name of the person who is submitting the protest and who is a parcel owner or tenant of the Parcel for which the protest has been submitted

D. The protest does not bear an original signature of the person submitting the protest. Whether a signature is valid shall be entrusted to the reasonable judgement of the City Clerk, or his or her designee.

E. The protest was altered in a way that raises a fair question as to whether the protest actually expresses the intent of a parcel owner or tenant to protest the Proposed Fee

F. The protest was not received by the City Clerk before the close of the public input portion of the public hearing on the Proposed Fee.

G. A request to withdraw the protest was received prior to the close of the public input portion of the public hearing on the Proposed Fee.

SECTION 9: City Clerk’s Decisions Final.

The City Clerk’s decision, or that of his or her designee, that a protest is not valid shall constitute a final action of the City and shall not be subject to any internal appeal.

SECTION 10: Majority Protest.

A majority protest exists if written protests are timely submitted and not withdrawn with respect to, a majority (50% plus one) of the parcels subject to the Proposed Fee.

SECTION 11: Tabulation of Protests.

At the conclusion of the public hearing, the City Clerk, or his or her designee, shall tabulate all protests received, including those received during the public hearing, and shall report the result to the City Council. If the number of protests received is insufficient to constitute a majority protest, the City Clerk, or his or her designee, may determine the absence of a majority protest without validating the protests received, but may instead deem them all valid without further examination.

SECTION 12: Report of Tabulation.

If at the conclusion of the public hearing, the City Clerk, or his or her designee, determines that he or she will require additional time to tabulate the protests, he or she shall so advise the City Council, which may adjourn the meeting to allow the results of the tabulation to be completed on another day or days.

FINAL FEE STUDY REPORT
FOR THE
CITY OF SAN BRUNO
STORM DRAINAGE AND FLOOD PROTECTION FEE

This study proposes a rate structure for a Storm Drainage and Flood Protection Fee for the City of San Bruno that is intended to comply with the requirements of Article XIII D, Section 6 of the California Constitution (a part of Proposition 218).

I, Tyrone Peter, authorized representative of Willdan, submit to the City of San Bruno this Fee Study for the Storm Drainage and Flood Protection Fee consisting of six (6) parts, with exhibits and appendices as follows:

SECTION 1 **Introduction and Background:** Provides general information and background of the existing storm drain system and the basis of the of the drainage fee and rate structure.

SECTION 2 **Impervious Surface and Factors:** Defines impervious surface and identifies the impervious factors used for each zoning category in the City of San Bruno.

SECTION 3 **Parcel Inventory and Zoning Acreages:** Identifies total area and acreages of the parcels in the City and the estimated impervious area of the City. Identifies the total parcel count for each land use type within the City.

SECTION 4 **Revenue Requirements:** Identifies the revenue requirements to (i) design and construct the required storm drain improvements, including new storm drain facilities needed to provide residents and business with adequate flood protection and replacement of the City's existing storm drain system, taking into account bond issuance and/or other financing costs, including incidental and administrative costs; (ii) maintain, service, repair, operate and periodically replace the aforementioned improvements; and (iii) administer the fee and the program of improvements, repairs, maintenance and replacements, including incidental and

administrative costs. This section also explains how the Storm Drainage and Flood Protection Fee is calculated and lists the median fee for each zoning category.

SECTION 5 Proposition 218 Compliance: General description of Proposition 218 compliance.

APPENDICES

A. The Fee Roll set forth in Appendix "A", which is attached hereto, referenced, and so incorporated.

B. The Cash Flow Analysis set forth in Appendix "B" which is attached hereto, referenced, and so incorporated.

Dated this 15th day of March 2021

Respectfully submitted,
WILLDAN

TYRONE PETER
CIVIL ENGINEER
STORM DRAIN USER FEE
CITY OF SAN BRUNO
COUNTY OF SAN MATEO
STATE OF CALIFORNIA

SECTION 1 - Introduction and Background

The City of San Bruno ("City") owns and maintains its storm drain collection system, which collects and distributes stormwater over six main watersheds. In 2014, The City commissioned a Storm Drain Master Plan ("Plan") to identify the causes of flooding within the storm drain system and develop alternative improvements to address the flooding. The capacity analysis was based on a 25-year design storm and identified multiple capacity deficiencies in the storm water collection system. The Plan included recommendations to address the system's capacity deficiency.

The City identified approximately $22.9 million in general replacement of existing improvements and the Plan has identified another $26 million (*$31 million – due to the rise in the construction cost index*) for capacity improvements in existing facilities to accommodate a 25-year storm event, along with $1.36 million in additional maintenance and operational costs. To date, none of the improvements identified in the Plan have been completed. The City's existing Storm Drainage and Flood Protection Fee does neither provides enough funding for regular maintenance of the existing system nor for all desirable repairs and replacements of elements of the deteriorated stormwater system. Currently, a General Fund transfer subsidizes the maintenance of the existing system. The City does not have current funding sources available to implement the recommended improvements in the Plan, and new funding sources are necessary to protect the public health and safety and alleviate flooding.

In August 2020, the City of San Bruno engaged Willdan to prepare this Fee Study. The purpose of this Study is to determine an equitable and legally permissible means of distributing a storm drain costs to each parcel within the City that is contributing to storm drain system. Since the impervious area of each parcel is an equitable means of determining a parcel's contribution to the storm drain system, and has been identified by the United States Environmental Protection Agency as "the most important factor influencing stormwater runoff"[1], the storm drain fee will be based on the impervious area of each parcel.

SECTION 1.1 PROPOSITION 218

Article XIII D, Section 6(b) of the California Constitution (a part of Proposition 218) Section 6.b requires that property-related fees, such as the fee proposed by this Study, meet the following requirements:

1. "Revenues derived from the fee or charge shall not exceed the funds required to provide the property-related service."

[1] EPA 901-F-09-004 *Funding Stormwater Programs* (April 2009)

2. "Revenues derived from the fee or charge shall not be used for any purpose other than that for which the fee or charge was imposed."
3. "The amount of fee or charge imposed upon any parcel or person as an incident of property ownership shall not exceed the proportional cost of the service attributable to the parcel."
4. "No fee or charge may be imposed for a service unless that service is actually used by, or immediately available to, the owner of the property in question. Fees or charges based on potential or future use of service are not permitted. Standby charges, whether characterized as charges or assessments, shall be classified as assessments and shall not be imposed without compliance with (the assessment section of this code).
5. "No fee or charge may be imposed for general governmental services including, but not limited to, police, fire, ambulance or library services where the service is available to the public at large in substantially the same manner as it is to the property owners.

The proposed Storm Drainage and Flood Protection Fee substantially meets all of these requirements. Compliance with Proposition 218 is discussed in detail in Section 6 of this report.

Basis of Fee Rate Structure

The City's storm drain system is self-contained; that is to say that properties not within the boundaries of the City do not discharge into the City's system, and the City's system does not discharge into the system of neighboring municipalities. All properties in the City discharge stormwater into the City's system. The stormwater system, by diverting stormwater into a guided and controlled path to specific discharge points, is critical for protecting against flooding.

In its Guide for Municipal Stormwater Funding, the Environmental Protection Agency states the following:

> *Empirical studies have demonstrated that impervious surface area on a property is the single most significant factor influencing all of these impacts. Impervious area is also relatively easy to identify and quantify numerically and is the most common parameter used in stormwater service fee calculations.*

In its natural state, soil absorbs rainwater. When a parcel is developed with impervious surfaces, soil on the parcel is covered with a waterproof, or near-waterproof, material. Consequently, the installation of impervious surfaces reduces the ability of the parcel to absorb rainwater and creates a need for a stormwater system that will manage runoff that is not absorbed by the parcel.

Consequently, the amount of impervious surface installed on a parcel, measured as a percentage of the total impervious surface installed throughout the City, is a

good approximation of the percentage of citywide storm drain system costs that represents the parcel's use of the storm drain system.

Assignment of Impervious Square Footage

Reliable data sets exist regarding the square footage of parcels in the City. However, there is was no existing data set measuring only impervious square footage. Therefore, as part of its work developing the proposed fee, Willdan imputed the impervious square footage of each parcel in the City based on available data.

As discussed in more detail later in this Study, Willdan's process for assigning an impervious square footage involved three steps:

First, for each of the City's 14 zoning designations, Willdan determined an estimate of the typical percentage of parcel surface area within the zone that would consist of impervious surface. This percentage is the "percent impervious factor" (PIF) for that zoning designation. PIF's were based on a prior study done by Willdan in the City of Burlingame, with spot checks using ariel imagery to verify the appropriateness of these PIF's for San Bruno and customize the PIF's to be used. The PIF's developed in this process, as explained further in this study, are as follows:

Zoning*	Zoning Definition**	Estimated PIF***
R-1	Single-Family Residential	60%
R-2	Low Density Residential	70%
R-3	Medium Density Residential	85%
R-4	High Density Residential	85%
C	General Commercial	90%
C-B-D	Central Business District	95%
C-M	Commercial Manufacturing	95%
C-N	Neighborhood Commercial	95%
C-O	Community Office	90%
A-R	Administrative and Research	90%
M-1	Industrial	95%
O	Open Space/Urban Parkland	10%
P-D	Planned Development	Varies
Undesignated	Undesignated	95%

Second, each parcel in the City was assigned an imputed impervious square footage figure by multiplying the lot square footage of that parcel by the PIF for the zoning of the parcel.

Third, Willdan reviewed ariel imagery to identify "exceptions"—situations where the standard method of multiplying a parcel's lot square footage by the PIF for that parcel's zoning did not yield an appropriate estimation of the parcel's impervious square footage. The assigned square footages for such parcels were adjusted as necessary. Examples of such exceptions were parcels that were developed for a use other than the common use of property in their land use zone (for example a school in an open space zone) and parcels in subdivisions that were developed in a manner that was atypical of development throughout the City for that zoning (for example a single family subdivision with very large parcels that are largely left in a natural state).

Vacant, unimproved parcels are still in their natural states and therefore have no impervious surface area.

Determination of Fee Rate

The rate of the fee proposed by this Study is expressed as an annual rate per square foot of impervious surface. The rate was determined by dividing the annual systemwide anticipated storm drain expenditures by the total number of impervious square feet determined to exist in the service area of the storm drain system. That calculation was as follows:

$3.24 Million divided by 64,946,619 impervious sq. ft. =

Annual Fee of $0.0498859 per sq. ft. of impervious area

In order to keep pace with inflation, this fee will be subject to annual adjustments based on the San Francisco Bay Area Construction Cost Index (CCI) as published by Engineering News Record (ENR).

Collection & Adjustments

The fee for each parcel will be calculated based on the impervious square footage determined by Willdan. The City will establish an appeals process to consider claims that the fee as applied their parcel was incorrectly calculated based on the actual development of their parcel or other appropriate factors.

SECTION 2 – Impervious Surface and Factors

In its Guide for Municipal Stormwater Funding, the Environmental Protection Agency states the following:

> *Empirical studies have demonstrated that impervious surface area on a property is the single most significant factor influencing all of these impacts. Impervious area is also relatively easy to identify and quantify numerically and is the most common parameter used in stormwater service fee calculations.*

As such, the amount of impervious surface on each parcel has been selected as the factor that most accurately reflects the benefit each parcel receives from storm drain improvements.

SECTION 2.1 DEFINITION OF IMPERVIOUS SURFACE

A formal definition of an impervious surface can be found in the U.S. Environmental Protection Agency's Draft Report on the Environment (2003a): "Impervious surface: A hard surface area that either prevents or retards the entry of water into the soil mantle or causes water to run off the surface in greater quantities or at an increased rate of flow. Common impervious surfaces include, but are not limited to rooftops, walkways, patios, driveways, parking lots, storage areas, concrete or asphalt paving, and gravel roads."

Willdan requested assessor parcel and land use GIS data from the City. The request was forwarded to the City's GIS consultant, Lynx GIS. Lynx GIS then provided:

1. San Bruno city boundary GIS polygon
2. San Mateo County GIS parcels
3. San Mateo County secured roll data in Microsoft Access format
4. San Mateo County GIS street centerlines (for creating street name labels for exhibits)
5. City of San Bruno Zoning GIS polygons

SECTION 2.2 CALCULATION OF IMPERVIOUS SURFACE

The impervious area calculations for most parcels were based on estimated impervious area percentages calculated by Willdan for parcels within a specific land use zoning designation.

High resolution aerial imagery was needed to verify the adopted percent impervious factors. Aerial imagery was also used to identify exceptions. For example, if a school, park, or church lies within a Residential zoning district or a potable water tank within an Open Space zoning district, the default PIF for that land use will not accurately reflect the impervious surface for the exception.

Methodology for Calculating PIFs

Impervious factors that reflect local conditions specific to San Bruno were developed for this study. Densities in San Bruno are higher than average for other communities not so near to San Francisco. Impervious factor tables in County hydrology manuals provided some guidance in developing the impervious factors, but they do not appear to reflect the higher-than-average density in the San Francisco Peninsula, particularly in denser residential areas. As such, Willdan performed impervious area studies for each zoning district in San Bruno.

In 2008, Willdan Engineering developed an impervious factor table for a stormwater fee project for the City of Burlingame. Average impervious factors for the land use districts in Burlingame were calculated. Because of the similarities of the communities of San Bruno and Burlingame, the impervious factors developed for Burlingame were used to verify and supplement the impervious studies performed for San Bruno.

Impervious studies were performed by referring to aerial imagery to draw GIS polygons on the impervious areas within a study area. The GIS was used to sum the impervious square feet within the study area. The sum was then divided by the study area total square feet to obtain the impervious area factor for the study area.

Willdan also considered percent impervious factors in Alameda County and Los Angeles County hydrology manuals (San Mateo County's hydrology manual does not include percent impervious factors). Alameda County and Los Angeles County hydrology manual impervious factor tables are provided in the Appendix to this report. Calculations related to each zoning designation are described below.

San Bruno Single-Family Residential (R-1) Default Impervious Factor

One impervious factor study for Single Family Residential (R-1) parcels in San Bruno was performed:

San Bruno Study Area - SFR (R1): 14,565 SF; Impervious Area: 8,966 SF; Impervious Percentage: 62

Three studies for Single Family Residential (R-1) parcels in Burlingame were reviewed and compared to the San Bruno R-1 study. The following figures depict the results of those studies.

Burlingame SFR (R1) Study Area 1: 36,020 SF; Impervious Area: 24,160 SF; Impervious Percentage: 67

Burlingame SFR (R1) Study Area 2: 34,500 SF; Impervious Area: 20,583 SF; Impervious Percentage: 60

Burlingame SFR (R1) Study Area 3: 36,000 SF; Impervious Area: 20,009 SF; Impervious Percentage: 56

For R-1 parcels, the PIF for San Bruno is consistent with the PIF used for Burlingame. As a result of these studies, an impervious area factor of 60 percent was adopted for San Bruno R-1 parcels.

San Bruno Single-Family Residential (R-1) Exceptions

Two neighborhoods in the city contain the majority of the R-1 exception parcels. There are 75 long, narrow parcels that are situated on steep hillsides in a R1 single-family residential zoning district in the northwest portion of the city. These parcels have a larger than average area and a smaller than average impervious surface. The impervious area of each individual parcel was not calculated; instead the impervious areas of 10 representative parcels were calculated and the results of those calculations was averaged to obtain an impervious factor of 32 percent. This factor was applied to the 75 exception parcels in the two neighborhoods.

The following two figures depict the exception areas in the two neighborhoods.

R1 Parcels Impervious Exception Area 1

R1 Parcels Impervious Exception Area 2

Low Density Residential (R-2) Default PIF

Willdan performed an impervious study for a block of homes in one of San Bruno's R-2 zoning districts.

San Bruno Study Area – R2 Zoning District: 118,030 SF; Impervious Area: 82,623 SF; Impervious Percentage: 70

Willdan also referred to a study performed for the City of Burlingame to help confirm the impervious factor for parcels in the San Bruno R-2 zoning districts.

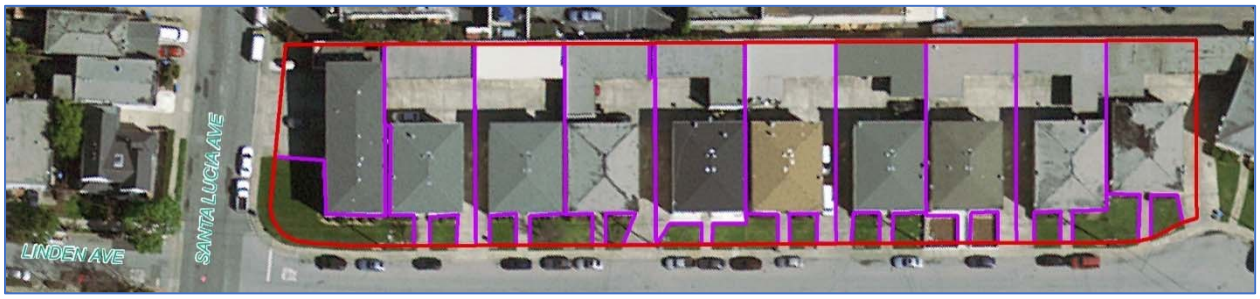
Burlingame Study Area - Duplex (R2): 49,100 SF; Impervious Area: 35,000 SF; Impervious Percentage: 71

The results of the studies in both cities were consistent. As such, an impervious area factor of 70 percent was adopted for San Bruno R-2 zoned parcels.

No exceptions were identified.

High-Density Residential (R-3) Default PIF

One study for the City of San Bruno and two studies for the City of Burlingame were used to determine the impervious factor for San Bruno R-3 zoning districts.



San Bruno Study Area – R-3: 56,391 SF; Impervious Area: 49,234 SF; Impervious Percentage: 87

Burlingame Study Area 1 – R-3: 72,400 SF; Impervious Area: 63,800 SF; Impervious Percentage: 88

Burlingame Study Area 2 – R-3: 44,400 SF; Impervious Area: 36,900 SF; Impervious Percentage: 83

The factors in both cities were consistent. As such, an impervious area factor of 85 percent was adopted for San Bruno R-3 parcels.

No exceptions were identified.

High-Density Residential (R-4) Zoning Districts Default PIF

High-Density Residential PIFs tend to be consistent across different jurisdictions. As such, a previously prepared study for the City of Burlingame was used as the primary factor in determining the impervious factor for San Bruno R-4 apartment buildings, condominiums or other high-density residential land uses.

Burlingame Study Area – R-4: 45,000 SF; Impervious Area: 39,120 SF; Impervious Percentage: 87

Impervious factors from Alameda and Los Angeles County hydrology manuals were also considered and showed consistent measurements. An impervious area factor of 85 percent was adopted for San Bruno R-4 parcels.

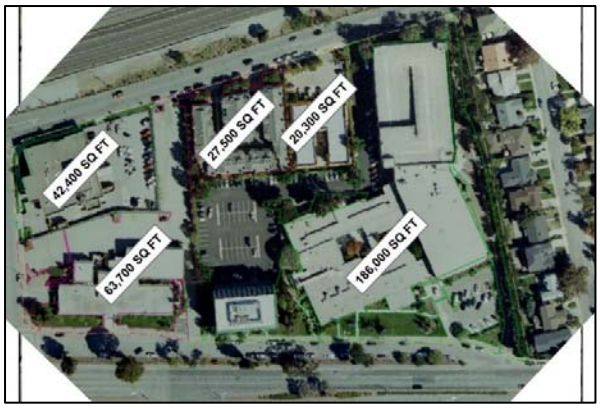
No exceptions were identified.

General Commercial (C) Zoning Districts Default PIF

Willdan performed an impervious study for a study area consisting of 11 parcels in one of San Bruno's General Commercial (C) zoning districts.

San Bruno Study Area – C: 60519 SF; Impervious Area: 53,792 SF; Impervious Percentage: 89

Two studies for the City of Burlingame were also used to help determine the impervious factor for San Bruno Commercial zoning districts.



Commercial (C) Study Area 1: Impervious Area: 340,000 SF; Impervious Percentage: 83

Commercial (C) Study Area 2: Impervious Area: 166,000 SF; Impervious Percentage: 92

Los Angeles County hydrology manual impervious factors were also considered. Based on the consistent results of these sources, an impervious factor of 90 percent was adopted for the City of San Bruno.

No exceptions were identified.

A-R Zoning District

The following figure depicts an impervious area analysis for a parcel in San Bruno's Administrative & Research (A-R) zoning district.

San Bruno A-R Study Area: 70,726 SF; Impervious Area: 62,547 SF; Impervious Percentage: 88

The characteristics of A-R zoned parcels appear to be similar to Commercial (C) parcels. As such, an impervious factor of 90 percent was adopted for San Bruno A-R parcels.

No exceptions were identified.

Industrial, Central Business District, Neighborhood Commercial and Commercial Manufacturing Zoning Districts Default PIF

Aerial imagery was used to determine the impervious factors for Industrial, Central Business District, Neighborhood Commercial and Commercial Manufacturing zoning districts. No impervious areas were seen on aerial imagery in any of these districts, except for an occasional small patch of landscaping. All examples appear to almost 100 percent impervious. The following figure provides an example of aerial imagery for a set of parcels (outlined in red) located in a San Bruno Commercial C-M zoning district.

San Bruno C-M Study Area

To account for the occasional small pervious areas, an impervious factor of 95 percent was adopted for Industrial, Central Business District, Neighborhood Commercial and Commercial Manufacturing Zoning Districts.

No exceptions were identified.

Open Space (O) Zoning Districts Default PIF

A factor of 10 percent impervious was adopted for Open Space zoning districts. This is a standard value commonly used in hydrology studies. The 10 percent factor accounts for sidewalks, restrooms and parking areas in parks and other outdoor recreational spaces. Alameda County's and Los Angeles County's hydrology manuals both list the impervious factor for open space parcels as 10 percent.

Open Space (O) Zoning Districts Exceptions

An example of an exception parcel in an Open Space zoning district is Crestmoor Elementary School. The impervious area of this parcel was calculated to be 30 percent. Studies on exceptions are shown below.

O Zoning District Exception Parcel – Crestmoor Elementary School: 111,477 SF; Impervious Area: 54,106; Impervious Percentage: 30

Another example of an *Open Space* zoning district exception parcel was this water storage facility with tank, driveways, pavement and structures (shown below). The impervious area of this parcel was calculated to be 49 percent.

O Zoning District Exception Parcel – Water Storage Facility: 111,477 SF; Impervious Area: 54,106; Impervious Percentage: 49

Note that the facility appears to have been under construction when the USGS imagery shown above was taken. Google Earth imagery and street view, which appears to be more recent, was used to help define the impervious area of the parcel.

Google Earth Imagery – Water Storage Facility

Planned Development (P-D) Zoning Districts

Various land uses are allowed in Planned Development zoning districts. A single impervious factor could not be assigned. It was necessary to use imagery to determine the land uses on all P-D zoned parcels.

P-D zoned parcels observed to have commercial or office building land uses were assigned an impervious factor of 90 percent, since parcels in *General Commercial* and *Community Office* zoning districts are also assigned an impervious factor of 90 percent. A hotel and a post office were also assigned an impervious factor of 90 percent. A parking lot that appeared to be completely covered with pavement was assigned an impervious factor of 95 percent.

Condominiums, townhomes and apartment buildings were assigned the 85 percent impervious factor for high-density residential land uses. Several vacant

parcels with no impervious surfaces on them were assigned a 0 percent impervious factor, since it is unknown what the ultimate land use will be.

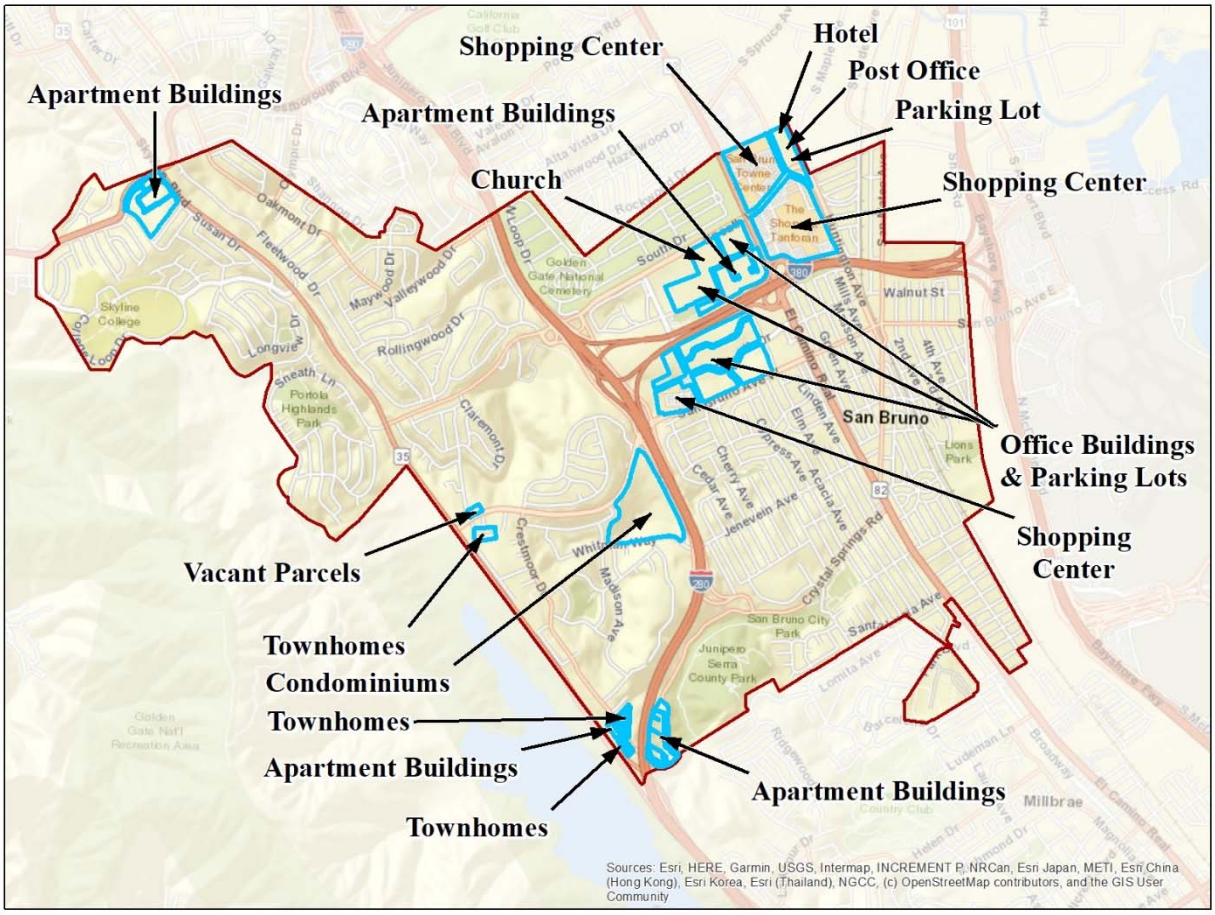
Three parcels were identified that are mostly or partly vacant but have some pavement on them. The impervious factors for these parcels were individually calculated.

P-D Zoning District - Vacant: 37,103 SF; Impervious Area: 3,450 SF; Impervious Percentage: 9.3

P-D Zoning District – Partly vacant with paving: 28,256 SF; Impervious Area: 19,828 SF; Impervious Percentage: 70

P-D Zoning District – Partly vacant with paving: 88,492 SF; Impervious Area: 29,464 SF; Impervious Percentage: 33

The land uses in *P-D* zoning districts are depicted in the following figure.



Undesignated (U) Zoning Districts Default PIF

Undesignated zoning districts consist of railroad rights of way and streets along Huntington Avenue and Montgomery Avenue in the northeastern part of the City. They consist mostly of street and parking lot pavement. They were assigned an impervious factor of 95 percent. This factor was chosen in part to be consistent with the 95 percent impervious factor for the Industrial, Central Business District, Neighborhood Commercial and Commercial Manufacturing zoning districts that adjoin the Undesignated zoning districts.

Common Area Calculations

There are several condominium developments in San Bruno:

- Peninsula Place Condominiums
- Shelter Creek Condominiums
- Cherry Avenue Villas

In this case, multiple owners occupy a single parcel. To allocate the fair share of the stormwater fee for each owner on a jointly-owned parcel, the impervious area of the parcel was divided by the number of owners on the parcel.

Example: a parcel in the R-4 Zoning district has an area of 50,000 square feet and contains 100 condominium units. The impervious factor for an R-4 parcel is 85 percent. The impervious area calculation is:

50,000 SF x 0.85/100 = 425 SF

SECTION 2.2 SUMMARY OF PIFS AND EXCEPTIONS

There are 14 different zoning designations within the City. The table below lists the various zoning designations and the PIFs determined for each zone.

Zoning*	Zoning Definition**	Estimated PIF***
R-1	Single-Family Residential	60%
R-2	Low Density Residential	70%
R-3	Medium Density Residential	85%
R-4	High Density Residential	85%
C	General Commercial	90%
C-B-D	Central Business District	95%
C-M	Commercial Manufacturing	95%
C-N	Neighborhood Commercial	95%
C-O	Community Office	90%
A-R	Administrative and Research	90%
M-1	Industrial	95%
O	Open Space/Urban Parkland	10%
P-D	Planned Development	Varies
Undesignated	Undesignated	95%

** Zoning attribute table field in Zoning GIS layer provided by Lynx GIS*

*** Description per San Bruno Municipal Code*

**** Developed from statistics for similar communities and from analysis of San Bruno aerial imagery*

The final impervious values are listed along with the fees for each parcel within the city in Appendix A.

SECTION 3 - Parcel Inventory and Zoning Acreages

The following table summarizes the various zoning categories, the number of parcels in each category, square footage, and acreage. Categories in which the PIF varies due to exceptions are noted below.

Parcel Count, Gross Area and Impervious Areas per Zone

Zoning	Zoning Description	No. Parcels	Gross Area (Sq. Ft.)	Calculated PIF	Impervious Area (Sq. Ft.)
A-R	Administrative and Research	12	612,039	90%	550,835
C	General Commercial	219	2,270,260	90%	2,040,984
C-B-D	Central Business District	111	614,687	95%	583,953
C-M	Commercial Manufacturing	11	159,769	95%	151,781
C-N	Neighborhood Commercial	75	1,071,337	95%	751,322
C-O	Community Office	6	657,483	90%	591,735
M-1	Industrial	135	2,004,339	95%	1,904,122
O	Open Space	59	23,996,610	Varies	4,284,095
P-D	Planned Development	1,455	13,330,557	Varies	10,145,522
R-1	Single-Family Residential	8,755	62,728,385	Varies	37,163,613
R-2	Low Density Residential	1,052	4,849,104	70%	3,394,373
R-3	Medium Density Residential	38	273,932	85%	232,842
R-4	High Density Residential	988	3,223,744	85%	1,850,089
U	Undesignated	18	1,370,616	95%	1,301,353
Total		**12,934**	**117,162,862**		**64,946,619**

SECTION 4 – Revenue Requirements & Fee Calculations

SECTION 4.1 – REVENUE REQUIREMENTS

The drainage fees collected by the City will be used to fund the following items:

- Design and construct the required storm drain improvements, including new storm drain facilities needed to provide residents and business with adequate flood protection and replacement of the City's existing storm drain system, taking into account bond issuance and/or other financing costs, including incidental and administrative costs;
- Maintain, service, repair, operate and periodically replace the aforementioned improvements; and
- Administer the fee and the program of improvements, repairs, maintenance and replacements, including incidental and administrative costs.

In 2014, The City commissioned a Storm Drain Master Plan to identify localized flooding that had raised concerns from the impacted residents. The study identified improvement projects from a 25-year storm event analysis that exceeded the system's capacity in all six watershed areas. A new Capital Improvement Plan (CIP) was developed to address the system's capacity deficiency. The recommended improvements are shown in the table below. Costs have been escalated by 17.53% to be expressed in current year dollars.

Priority	Project ID	Estimated Cost (2020$)	Description and Location	Constructed	Problem
1.1	A-1	$5,958,771	Belle air box: north side of Pine Street	1900s	Existing RCBs are undersized
1.1A	A-4, A-5	$8,685,467	Other pipeline upsizing to prevent need for detention basin in Crestmoor Canyon	N/A	Water retention during periods of heaving rain
1.1B	A-2	$3,138,051	Upsize the Belle Air storm drain by adding a third 9' x 5' Reinforced Concrete Box (RCB).	N/A	Backwater caused by the undersized system impacts much of the lower City watersheds
1.2	E	$2,303,588	Pipeline improvement: 7th and Angus Avenues adjacent to pump station	1960s	Existing pipes are undersized
1.3	C-1	$176,295	Bolt manholes and install catch basin backflow preventers in the vicinity of San Mateo, Huntington, Angus and Kains Avenues	1900s	Flat area; existing ground elevations are low; existing pipe has very shallow cover
1.4	F	$2,221,317	Pipeline improvement: San Bruno Avenue East	1960s	Existing pipes are undersized

2.1	C-2	$2,632,672	Pipeline improvement: North of Jenevein Avenue & El Camino Real	1900s	Existing pipes are undersized
2.2	C-3	$1,657,173	Pipeline improvement: Jenevein Avenue between Hazel & Cypress Avenues	1900s	Existing pipes are undersized
2.3	A-3	$963,746	Pipeline improvement: El Camino Real at 380 undercrossing	1970s	Existing pipes are undersized
2.4	C-4	$1,621,914	Pipeline improvement: Whitman Way between Madison Avenue & Eastburn Court	1950s	Existing pipes are undersized
2.5	B-1	$1,281,077	Pipeline improvement: Huntington Avenue at Cupid Row	1900s	Existing pipe has insufficient capacity due to flat slope
2.6	B-2	$105,077	Concrete channel at City Park: south side of Crystal Spring Avenue	Park	Existing channel is undersized and running into parking lot
2.7	D	$258,566	Catch basins at San Antonio Avenue	1900s	Existing street geometry has insufficient capacity for the overland flow
Total		**$31,004,414**			

SECTION 4.2 – ANNUITY CALCULATIONS

The City intends to design and construct the necessary storm drain improvements over a 30-year period. After all facilities have been constructed, the fee will continue to be levied as needed to fund annual maintenance and periodic repair and replacement. It is estimated that 85% of the construction will be funded within 20 years. The new and replaced facilities are summarized below.

New Construction Funding Needs (2020$)	$31,004,414
Capital Replacement Funding Needs (2020$)	$22,889,700
Total Funding Needs (2020$)	$53,894,114

The design and construction of the improvements will be funded by a combination of municipal bond issuances and pay-as-you-go funding. The annual budget needed to complete the recommended improvements is approximately $1.88 million per year.

In addition to the implementation of the recommended improvements, the City plans to add two regular maintenance workers. The existing operating expenditures plus the additional maintenance workers will come to $1,362,000 in 2022 dollars. For the purposes of analysis, this amount is assumed to escalate by 3% per year.

The $1.88 million in capital funding and the $1.36 million in operations and maintenance funding total the $3.24 million in annual expenditures that will be used to fund both requirements.

A cash flow financial analysis showing the issuance of three separate bonds in 2022, 2027 and 2032 is included in Appendix B.

SECTION 4.3 – FEE CALCULATION

In order to determine the fee for each parcel, the total impervious area within the City was estimated based on the zoning and lot size. The annual cost of $3.24 Million divided by the total impervious area of the City (64,946,619 sq. ft.) equates to $0.0498859 per sq. ft. of impervious area.

The following table summarizes the Median Fee for each land use.

Median Fee for Each Land Use

Zoning	No. Parcels	Median Fee
A-R	12	$476.25
C	219	$272.26
C-B-D	111	$178.66
C-M	11	$397.31
C-N	75	$169.17
C-O	6	$2,508.30
M-1	135	$236.96
O	59	$476.65
P-D	1,455	$54.91
R-1	8,755	$154.31
R-2	1,052	$171.92
R-3	38	$208.16
R-4	988	$52.76
U	18	$1,242.54

SECTION 4.3 – STORM DRAINAGE AND FLOOD PROTECTION FEE CALCULATIONS

The amount of the Storm Drainage and Flood Protection Fee for each individual parcel shall be computed as follows: Parcel square footage shall be multiplied by the percentage of impervious surface on the parcel. The resulting number shall be multiplied by the storm drain fee rate, which shall be the per square foot impervious surface rate in order to calculate the dollar amount of the fee. For the current fiscal year, the storm drain fee rate is $0.0498859.

The maximum annual rate shall be adjusted upward each year based on the San Francisco Bay Area Construction Cost Index (CCI) as published by Engineering News Record (ENR). When the maximum annual rate is adjusted for inflation, the annual fee levy may be adjusted accordingly for the following fiscal year. Likewise, when the impervious surface of a parcel is increased or decreased, the annual fee amount shall be adjusted for the fiscal year next succeeding the change in impervious surface.

The annual fee for each parcel within the City of San Bruno is included in Appendix A.

SECTION 5 – Proposition 218 Compliance

The following section details the proposed fee's compliance with Proposition 218.

Article XIII, Section D of the California Constitution (Proposition 218) Section 6.b of Prop. 218 sets forth the following key requirements for all new, extended, imposed or increased fees and charges:

1. *"Revenues derived from the fee or charge shall not exceed the funds required to provide the property-related service."*

Section 4 of this report details the expenditures required to make the necessary storm drain improvements and demonstrates that the fee will not exceed what is needed for construction, replacement, operations and maintenance.

2. *"Revenues derived from the fee or charge shall not be used for any purpose other than that for which the fee or charge was imposed"*

Section 4 of this report specifies all eligible expenditures and shows that will be no revenues available to spend on ineligible expenditures. If revenues do exceed the amount needed, the fee will be reduced accordingly.

3. *"the amount of fee or charge imposed upon any parcel or person as an incident of property ownership shall not exceed the proportional cost of the service attributable to the parcel"*

Section 2 demonstrates that the fee for each parcel will be proportional to the cost of the service attributable to such parcel. The methodology is based on the best available information and a benefit methodology that is accepted by the United States Environmental Protection Agency.

4. *"No fee or charge may be imposed for a service unless that service is actually used by, or immediately available to, the owner of the property in question. Fees or charges based on potential or future use of service are not permitted. Standby charges, whether characterized as charges or assessments, shall be classified as assessments and shall not be imposed without compliance with (the assessment section of this code).*

All parcels are assigned impervious surface measurements based on their current state of development – not on their potential to be developed.

5. *"No fee or charge may be imposed for general governmental services including, but not limited to, police, fire, ambulance or library services where the service is available to the public at large in substantially the same manner as it is to the property owners.*

As shown in Section 4, this fee will only be used for eligible expenditures and will not be used on general government services.

APPENDICES

APPENDIX A FEE ROLL

APN	Zoning	Zoning Description	Percent Impervious	Exception	Parcel Sq. Ft.	Impervious Sq. Ft.	Fee
093340100	O	Open Space	0.10	No	45,170.17	4,517.02	$225.34
014267300	O	Open Space	0.10	No	7,176.98	717.70	$35.80
014320010	O	Open Space	0.10	No	6,955,057.78	695,505.78	$34,695.93

FINAL FEE STUDY REPORT FOR THE CITY OF SAN BRUNO STORM DRAINAGE AND FLOOD PROTECTION FEE

This study proposes a rate structure for a Storm Drainage and Flood Protection Fee for the City of San Bruno that is intended to comply with the requirements of Article XIII D, Section 6 of the California Constitution (a part of Proposition 218).

I, Tyrone Peter, authorized representative of Willdan, submit to the City of San Bruno this Fee Study for the Storm Drainage and Flood Protection Fee consisting of six (6) parts, with exhibits and appendices as follows:

SECTION 1 **Introduction and Background:** Provides general information and background of the existing storm drain system and the basis of the of the drainage fee and rate structure.

SECTION 2 **Impervious Surface and Factors:** Defines impervious surface and identifies the impervious factors used for each zoning category in the City of San Bruno.

SECTION 3 **Parcel Inventory and Zoning Acreages:** Identifies total area and acreages of the parcels in the City and the estimated impervious area of the City. Identifies the total parcel count for each land use type within the City.

SECTION 4 **Revenue Requirements:** Identifies the revenue requirements to (i) design and construct the required storm drain improvements, including new storm drain facilities needed to provide residents and business with adequate flood protection and replacement of the City's existing storm drain system, taking into account bond issuance and/or other financing costs, including incidental and administrative costs; (ii) maintain, service, repair, operate and periodically replace the aforementioned improvements; and (iii) administer the fee and the program of improvements, repairs, maintenance and replacements, including incidental and

administrative costs. This section also explains how the Storm Drainage and Flood Protection Fee is calculated and lists the median fee for each zoning category.

SECTION 5 Proposition 218 Compliance: General description of Proposition 218 compliance.

APPENDICES

A. The Fee Roll set forth in Appendix "A", which is attached hereto, referenced, and so incorporated.

B. The Cash Flow Analysis set forth in Appendix "B" which is attached hereto, referenced, and so incorporated.

Dated this 15th day of March 2021

Respectfully submitted,
WILLDAN

TYRONE PETER
CIVIL ENGINEER
STORM DRAIN USER FEE
CITY OF SAN BRUNO
COUNTY OF SAN MATEO
STATE OF CALIFORNIA

SECTION 1 - Introduction and Background

The City of San Bruno ("City") owns and maintains its storm drain collection system, which collects and distributes stormwater over six main watersheds. In 2014, The City commissioned a Storm Drain Master Plan ("Plan") to identify the causes of flooding within the storm drain system and develop alternative improvements to address the flooding. The capacity analysis was based on a 25-year design storm and identified multiple capacity deficiencies in the storm water collection system. The Plan included recommendations to address the system's capacity deficiency.

The Plan identified approximately $22.9 million in improvements and the City has identified $35 million in existing facilities in need of replacement, along with $1.36 million in additional maintenance and operational costs. To date, none of the improvements identified in the Plan have been completed. The City's existing Storm Drainage and Flood Protection Fee does neither provides enough funding for regular maintenance of the existing system nor for all desirable repairs and replacements of elements of the deteriorated stormwater system. Currently, a General Fund transfer subsidizes the maintenance of the existing system. The City does not have current funding sources available to implement the recommended improvements in the Plan, and new funding sources are necessary to protect the public health and safety and alleviate flooding.

In August 2020, the City of San Bruno engaged Willdan to prepare this Fee Study. The purpose of this Study is to determine an equitable and legally permissible means of distributing a storm drain costs to each parcel within the City that is contributing to storm drain system. Since the impervious area of each parcel is an equitable means of determining a parcel's contribution to the storm drain system, and has been identified by the United States Environmental Protection Agency as "the most important factor influencing stormwater runoff"[1], the storm drain fee will be based on the impervious area of each parcel.

SECTION 1.1 PROPOSITION 218

Article XIII D, Section 6(b) of the California Constitution (a part of Proposition 218) Section 6.b requires that property-related fees, such as the fee proposed by this Study, meet the following requirements:

1. "Revenues derived from the fee or charge shall not exceed the funds required to provide the property-related service."
2. "Revenues derived from the fee or charge shall not be used for any purpose other than that for which the fee or charge was imposed."

[1] EPA 901-F-09-004 *Funding Stormwater Programs* (April 2009)

3. "The amount of fee or charge imposed upon any parcel or person as an incident of property ownership shall not exceed the proportional cost of the service attributable to the parcel."
4. "No fee or charge may be imposed for a service unless that service is actually used by, or immediately available to, the owner of the property in question. Fees or charges based on potential or future use of service are not permitted. Standby charges, whether characterized as charges or assessments, shall be classified as assessments and shall not be imposed without compliance with (the assessment section of this code).
5. "No fee or charge may be imposed for general governmental services including, but not limited to, police, fire, ambulance or library services where the service is available to the public at large in substantially the same manner as it is to the property owners.

The proposed Storm Drainage and Flood Protection Fee substantially meets all of these requirements. Compliance with Proposition 218 is discussed in detail in Section 6 of this report.

Basis of Fee Rate Structure

The City's storm drain system is self-contained; that is to say that properties not within the boundaries of the City do not discharge into the City's system, and the City's system does not discharge into the system of neighboring municipalities. All properties in the City discharge stormwater into the City's system. The stormwater system, by diverting stormwater into a guided and controlled path to specific discharge points, is critical for protecting against flooding.

In its Guide for Municipal Stormwater Funding, the Environmental Protection Agency states the following:

> *Empirical studies have demonstrated that impervious surface area on a property is the single most significant factor influencing all of these impacts. Impervious area is also relatively easy to identify and quantify numerically and is the most common parameter used in stormwater service fee calculations.*

In its natural state, soil absorbs rainwater. When a parcel is developed with impervious surfaces, soil on the parcel is covered with a waterproof, or near-waterproof, material. Consequently, the installation of impervious surfaces reduces the ability of the parcel to absorb rainwater and creates a need for a stormwater system that will manage runoff that is not absorbed by the parcel.

Consequently, the amount of impervious surface installed on a parcel, measured as a percentage of the total impervious surface installed throughout the City, is a good approximation of the percentage of citywide storm drain system costs that represents the parcel's use of the storm drain system.

Assignment of Impervious Square Footage

Reliable data sets exist regarding the square footage of parcels in the City. However, there was no existing data set measuring only impervious square footage. Therefore, as part of its work developing the proposed fee, Willdan imputed the impervious square footage of each parcel in the City based on available data.

As discussed in more detail later in this Study, Willdan's process for assigning an impervious square footage involved three steps:

First, for each of the City's 14 zoning designations, Willdan determined an estimate of the typical percentage of parcel surface area within the zone that would consist of impervious surface. This percentage is the "percent impervious factor" (PIF) for that zoning designation. PIF's were based on a prior study done by Willdan in the City of Burlingame, with spot checks using ariel imagery to verify the appropriateness of these PIF's for San Bruno and customize the PIF's to be used. The PIF's developed in this process, as explained further in this study, are as follows:

Zoning*	Zoning Definition**	Estimated PIF***
R-1	Single-Family Residential	60%
R-2	Low Density Residential	70%
R-3	Medium Density Residential	85%
R-4	High Density Residential	85%
C	General Commercial	90%
C-B-D	Central Business District	95%
C-M	Commercial Manufacturing	95%
C-N	Neighborhood Commercial	95%
C-O	Community Office	90%
A-R	Administrative and Research	90%
M-1	Industrial	95%
O	Open Space/Urban Parkland	10%
P-D	Planned Development	Varies
Undesignated	Undesignated	95%

Second, each parcel in the City was assigned an imputed impervious square footage figure by multiplying the lot square footage of that parcel by the PIF for the zoning of the parcel.

Third, Willdan reviewed ariel imagery to identify "exceptions"—situations where the standard method of multiplying a parcel's lot square footage by the PIF for that parcel's zoning did not yield an appropriate estimation of the parcel's impervious square footage. The assigned square footages for such parcels were adjusted as

necessary. Examples of such exceptions were parcels that were developed for a use other than the common use of property in their land use zone (for example a school in an open space zone) and parcels in subdivisions that were developed in a manner that was atypical of development throughout the City for that zoning (for example a single-family subdivision with very large parcels that are largely left in a natural state).

Vacant, unimproved parcels are still in their natural states and therefore have no impervious surface area.

Determination of Fee Rate

The rate of the fee proposed by this Study is expressed as an annual rate per square foot of impervious surface. The rate was determined by dividing the annual systemwide anticipated storm drain expenditures by the total number of impervious square feet determined to exist in the service area of the storm drain system. That calculation was as follows:

$3.14 Million divided by 62,891,291 impervious sq. ft. =

Annual Fee of $0.0498859 per sq. ft. of impervious area

In order to keep pace with inflation, this fee will be subject to annual adjustments based on the San Francisco Bay Area Construction Cost Index (CCI) as published by Engineering News Record (ENR).

Collection & Adjustments

The fee for each parcel will be calculated based on the impervious square footage determined by Willdan. The City will establish an appeals process to consider claims that the fee as applied their parcel was incorrectly calculated based on the actual development of their parcel or other appropriate factors.

SECTION 2 – Impervious Surface and Factors

In its Guide for Municipal Stormwater Funding, the Environmental Protection Agency states the following:

> *Empirical studies have demonstrated that impervious surface area on a property is the single most significant factor influencing all of these impacts. Impervious area is also relatively easy to identify and quantify numerically and is the most common parameter used in stormwater service fee calculations.*

As such, the amount of impervious surface on each parcel has been selected as the factor that most accurately reflects the benefit each parcel receives from storm drain improvements.

SECTION 2.1 DEFINITION OF IMPERVIOUS SURFACE

A formal definition of an impervious surface can be found in the U.S. Environmental Protection Agency's Draft Report on the Environment (2003a): "Impervious surface: A hard surface area that either prevents or retards the entry of water into the soil mantle or causes water to run off the surface in greater quantities or at an increased rate of flow. Common impervious surfaces include, but are not limited to rooftops, walkways, patios, driveways, parking lots, storage areas, concrete or asphalt paving, and gravel roads."

Willdan requested assessor parcel and land use GIS data from the City. The request was forwarded to the City's GIS consultant, Lynx GIS. Lynx GIS then provided:

1. San Bruno city boundary GIS polygon
2. San Mateo County GIS parcels
3. San Mateo County secured roll data in Microsoft Access format
4. San Mateo County GIS street centerlines (for creating street name labels for exhibits)
5. City of San Bruno Zoning GIS polygons

SECTION 2.2 CALCULATION OF IMPERVIOUS SURFACE

The impervious area calculations for most parcels were based on estimated impervious area percentages calculated by Willdan for parcels within a specific land use zoning designation.

High resolution aerial imagery was needed to verify the adopted percent impervious factors. Aerial imagery was also used to identify exceptions. For example, if a school, park, or church lies within a Residential zoning district or a potable water tank within an Open Space zoning district, the default PIF for that land use will not accurately reflect the impervious surface for the exception.

Methodology for Calculating PIFs

Impervious factors that reflect local conditions specific to San Bruno were developed for this study. Densities in San Bruno are higher than average for other communities not so near to San Francisco. Impervious factor tables in County hydrology manuals provided some guidance in developing the impervious factors, but they do not appear to reflect the higher-than-average density in the San Francisco Peninsula, particularly in denser residential areas. As such, Willdan performed impervious area studies for each zoning district in San Bruno.

In 2008, Willdan Engineering developed an impervious factor table for a stormwater fee project for the City of Burlingame. Average impervious factors for the land use districts in Burlingame were calculated. Because of the similarities of the communities of San Bruno and Burlingame, the impervious factors developed for Burlingame were used to verify and supplement the impervious studies performed for San Bruno.

Impervious studies were performed by referring to aerial imagery to draw GIS polygons on the impervious areas within a study area. The GIS was used to sum the impervious square feet within the study area. The sum was then divided by the study area total square feet to obtain the impervious area factor for the study area.

Willdan also considered percent impervious factors in Alameda County and Los Angeles County hydrology manuals (San Mateo County's hydrology manual does not include percent impervious factors). Alameda County and Los Angeles County hydrology manual impervious factor tables are provided in the Appendix to this report. Calculations related to each zoning designation are described below.

San Bruno Single-Family Residential (R-1) Default Impervious Factor

One impervious factor study for Single Family Residential (R-1) parcels in San Bruno was performed:

San Bruno Study Area - SFR (R1): 14,565 SF; Impervious Area: 8,966 SF; Impervious Percentage: 62

Three studies for Single Family Residential (R-1) parcels in Burlingame were reviewed and compared to the San Bruno R-1 study. The following figures depict the results of those studies.

Burlingame SFR (R1) Study Area 1: 36,020 SF; Impervious Area: 24,160 SF; Impervious Percentage: 67

Burlingame SFR (R1) Study Area 2: 34,500 SF; Impervious Area: 20,583 SF; Impervious Percentage: 60

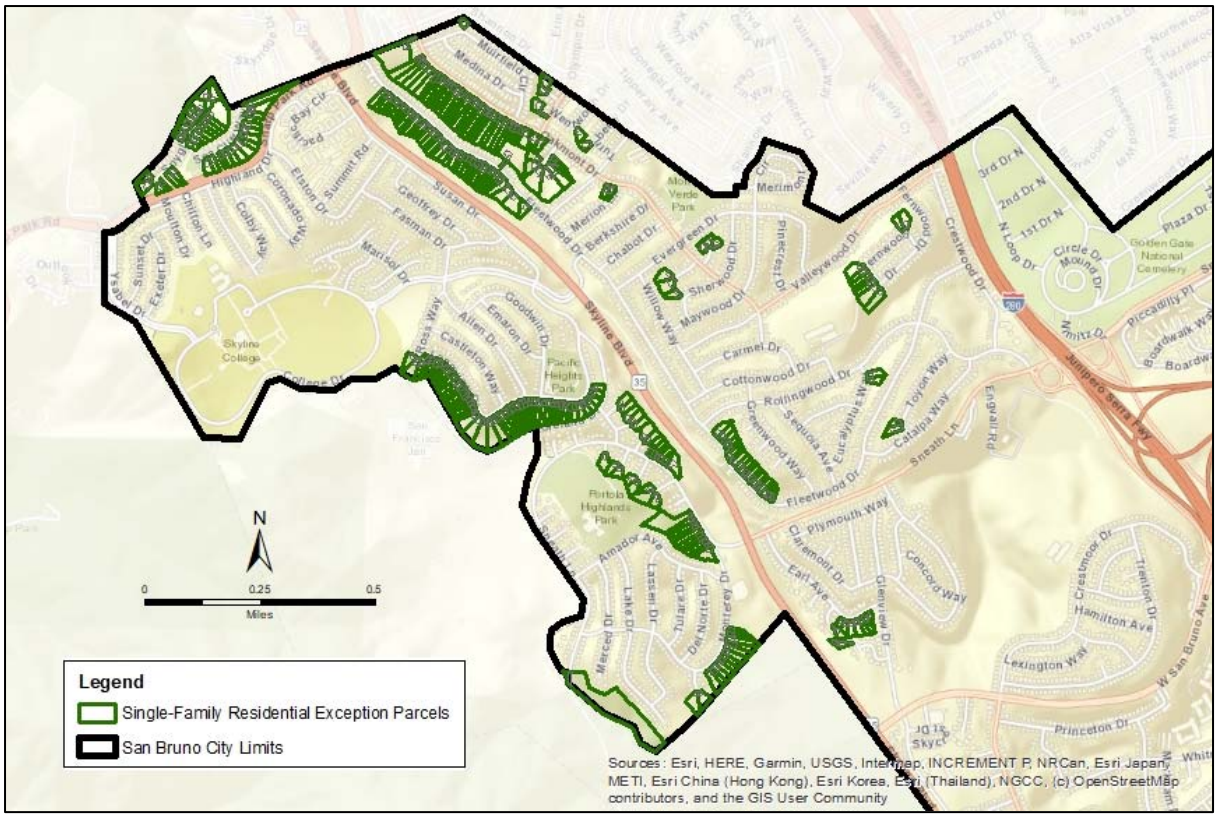
Burlingame SFR (R1) Study Area 3: 36,000 SF; Impervious Area: 20,009 SF; Impervious Percentage: 56

For R-1 parcels, the PIF for San Bruno is consistent with the PIF used for Burlingame. As a result of these studies, an impervious area factor of 60 percent was adopted for San Bruno R-1 parcels.

San Bruno Single-Family Residential (R-1) Exceptions

There are 272 long, narrow parcels that are situated on steep hillsides in R1 Single Family Residential zoning areas in the northwest portion of the city. The area where these parcels are located is bounded generally by the San Bruno city limits on the north and west, Interstate 280 on the east and San Bruno Avenue on the south. These parcels have a larger than average area and a smaller than average impervious surface, which when taken together results in an impervious factor that is less than 60%, the standard PIF for R1 Single Family parcels. The impervious area of each individual parcel was calculated by drawing polygons (borders) around the impervious surfaces within each parcel, then using a tool in the GIS software to calculate the impervious area.

The following figure depicts locations of the R1 impervious exception parcels.



R1 Impervious Exception Parcels

The figure below illustrates some sample impervious area polygon borders drawn by referencing aerial imagery. The parcels shown are on Longview Dr. in the Portola Highlands neighborhood.

R1 Parcels - Impervious Area Polygons

The figure shows why these parcels could not be assigned the standard sixty percent impervious area factor. The impervious areas of these exception parcels are seen to be similar to that of standard size single-family residential parcels (like those on Castleton Dr. in the figure), but the areas of these lots to the rear of the parcels are much larger, and not developable due to the steep slopes behind the homes.

The following table lists the exceptions described above and the revised impervious square footage.

Low Density Residential (R-2) Default PIF

Willdan performed an impervious study for a block of homes in one of San Bruno's R-2 zoning districts.

San Bruno Study Area – R2 Zoning District: 118,030 SF; Impervious Area: 82,623 SF; Impervious Percentage: 70

Willdan also referred to a study performed for the City of Burlingame to help confirm the impervious factor for parcels in the San Bruno R-2 zoning districts.

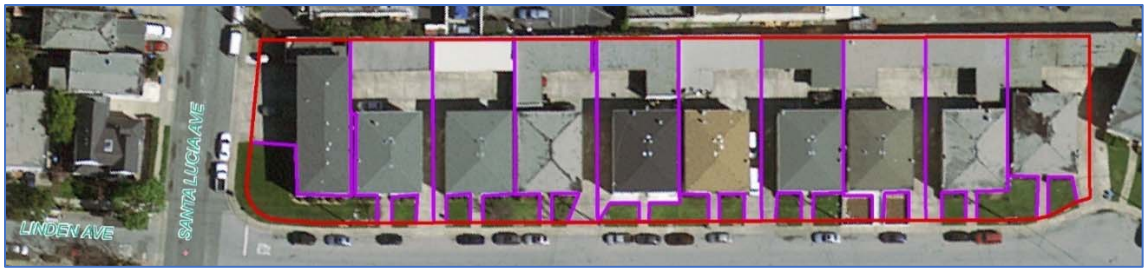
Burlingame Study Area - Duplex (R2): 49,100 SF; Impervious Area: 35,000 SF; Impervious Percentage: 71

The results of the studies in both cities were consistent. As such, an impervious area factor of 70 percent was adopted for San Bruno R-2 zoned parcels.

No exceptions were identified.

High-Density Residential (R-3) Default PIF

One study for the City of San Bruno and two studies for the City of Burlingame were used to determine the impervious factor for San Bruno R-3 zoning districts.



San Bruno Study Area – R-3: 56,391 SF; Impervious Area: 49,234 SF; Impervious Percentage: 87

Burlingame Study Area 1 – R-3: 72,400 SF; Impervious Area: 63,800 SF; Impervious Percentage: 88

Burlingame Study Area 2 – R-3: 44,400 SF; Impervious Area: 36,900 SF; Impervious Percentage: 83

The factors in both cities were consistent. As such, an impervious area factor of 85 percent was adopted for San Bruno R-3 parcels.

No exceptions were identified.

High-Density Residential (R-4) Zoning Districts Default PIF

High-Density Residential PIFs tend to be consistent across different jurisdictions. As such, a previously prepared study for the City of Burlingame was used as the primary factor in determining the impervious factor for San Bruno R-4 apartment buildings, condominiums or other high-density residential land uses.

Burlingame Study Area – R-4: 45,000 SF; Impervious Area: 39,120 SF; Impervious Percentage: 87

Impervious factors from Alameda and Los Angeles County hydrology manuals were also considered and showed consistent measurements. An impervious area factor of 85 percent was adopted for San Bruno R-4 parcels.

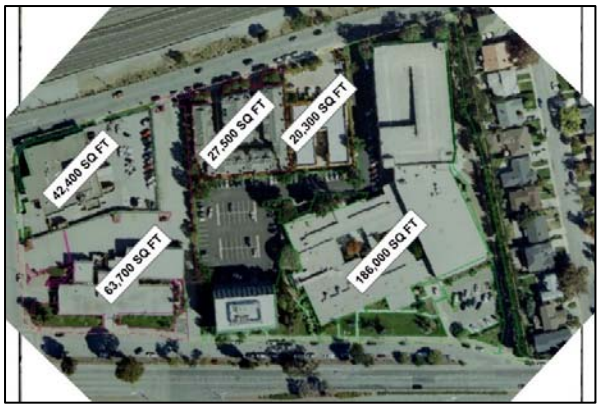
No exceptions were identified.

General Commercial (C) Zoning Districts Default PIF

Willdan performed an impervious study for a study area consisting of 11 parcels in one of San Bruno's General Commercial (C) zoning districts.

San Bruno Study Area – C: 60519 SF; Impervious Area: 53,792 SF; Impervious Percentage: 89

Two studies for the City of Burlingame were also used to help determine the impervious factor for San Bruno Commercial zoning districts.



Commercial (C) Study Area 1: Impervious Area: 340,000 SF; Impervious Percentage: 83

Commercial (C) Study Area 2: Impervious Area: 166,000 SF; Impervious Percentage: 92

Los Angeles County hydrology manual impervious factors were also considered. Based on the consistent results of these sources, an impervious factor of 90 percent was adopted for the City of San Bruno.

No exceptions were identified.

A-R Zoning District

The following figure depicts an impervious area analysis for a parcel in San Bruno's Administrative & Research (A-R) zoning district.

San Bruno A-R Study Area: 70,726 SF; Impervious Area: 62,547 SF; Impervious Percentage: 88

The characteristics of A-R zoned parcels appear to be similar to Commercial (C) parcels. As such, an impervious factor of 90 percent was adopted for San Bruno A-R parcels.

No exceptions were identified.

Industrial, Central Business District, Neighborhood Commercial and Commercial Manufacturing Zoning Districts Default PIF

Aerial imagery was used to determine the impervious factors for Industrial, Central Business District, Neighborhood Commercial and Commercial Manufacturing zoning districts. No impervious areas were seen on aerial imagery in any of these districts, except for an occasional small patch of landscaping. All examples appear to almost 100 percent impervious. The following figure provides an example of aerial imagery for a set of parcels (outlined in red) located in a San Bruno Commercial C-M zoning district.

San Bruno C-M Study Area

To account for the occasional small pervious areas, an impervious factor of 95 percent was adopted for Industrial, Central Business District, Neighborhood Commercial and Commercial Manufacturing Zoning Districts.

The only exception identified was APN 092020080. The impervious square footage of this parcel was determined to be 66,736.

Open Space (O) Zoning Districts Default PIF

A factor of 10 percent impervious was adopted for Open Space zoning districts. This is a standard value commonly used in hydrology studies. The 10 percent factor accounts for sidewalks, restrooms and parking areas in parks and other outdoor recreational spaces. Alameda County's and Los Angeles County's hydrology manuals both list the impervious factor for open space parcels as 10 percent.

Open Space (O) Zoning Districts Exceptions

An example of an exception parcel in an Open Space zoning district is Crestmoor Elementary School. The impervious area of this parcel was calculated to be 30 percent. Studies on exceptions are shown below.

O Zoning District Exception Parcel – Crestmoor Elementary School: 111,477 SF; Impervious Area: 54,106; Impervious Percentage: 30

Another example of an *Open Space* zoning district exception parcel was this water storage facility with tank, driveways, pavement and structures (shown below). The impervious area of this parcel was calculated to be 49 percent.

O Zoning District Exception Parcel – Water Storage Facility: 111,477 SF; Impervious Area: 54,106; Impervious Percentage: 49

Note that the facility appears to have been under construction when the USGS imagery shown above was taken. Google Earth imagery and street view, which appears to be more recent, was used to help define the impervious area of the parcel.

Open space parcel 020430020 was individually measured and determined to have 54,651 impervious square feet.

Google Earth Imagery – Water Storage Facility

Planned Development (P-D) Zoning Districts

Various land uses are allowed in Planned Development zoning districts. A single impervious factor could not be assigned. It was necessary to use imagery to determine the land uses on all P-D zoned parcels.

P-D zoned parcels observed to have commercial, or office building land uses were assigned an impervious factor of 90 percent, since parcels in *General Commercial* and *Community Office* zoning districts are also assigned an impervious factor of 90 percent. A hotel and a post office were also assigned an impervious factor of 90 percent. A parking lot that appeared to be completely covered with pavement was assigned an impervious factor of 95 percent.

Condominiums, townhomes, and apartment buildings were assigned the 85 percent impervious factor for high-density residential land uses. Several vacant parcels with no impervious surfaces on them were assigned a 0 percent impervious factor, since it is unknown what the ultimate land use will be.

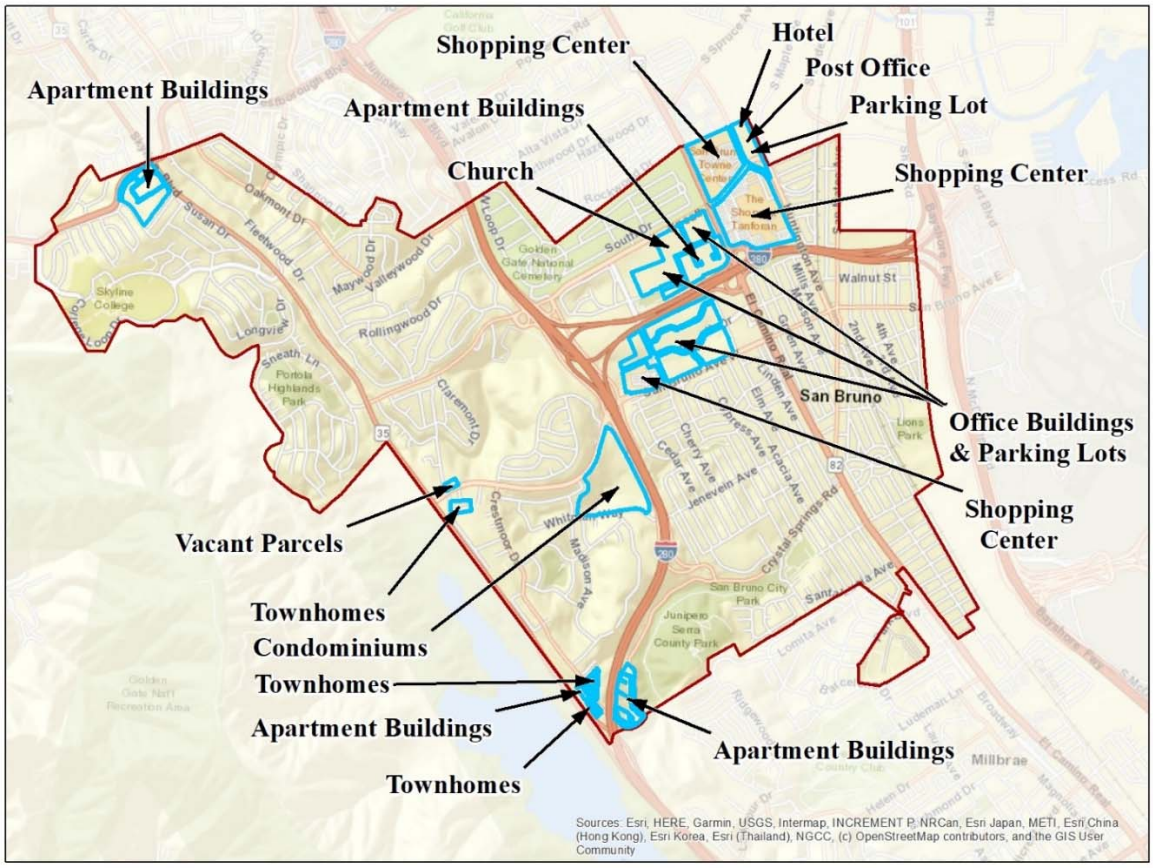
Three parcels were identified that are mostly or partly vacant but have some pavement on them. The impervious factors for these parcels were individually calculated.

P-D Zoning District - Vacant: 37,103 SF; Impervious Area: 3,450 SF; Impervious Percentage: 9.3

P-D Zoning District – Partly vacant with paving: 28,256 SF; Impervious Area: 19,828 SF; Impervious Percentage: 70

P-D Zoning District – Partly vacant with paving: 88,492 SF; Impervious Area: 29,464 SF; Impervious Percentage: 33

The land uses in *P-D* zoning districts are depicted in the following figure.



Undesignated (U) Zoning Districts Default PIF

Undesignated zoning districts consist of railroad rights of way and streets along Huntington Avenue and Montgomery Avenue in the northeastern part of the City. They consist mostly of street and parking lot pavement. They were assigned an impervious factor of 95 percent. This factor was chosen in part to be consistent with the 95 percent impervious factor for the Industrial, Central Business District, Neighborhood Commercial and Commercial Manufacturing zoning districts that adjoin the Undesignated zoning districts.

Common Area Calculations

There are several condominium developments in San Bruno:

- Peninsula Place Condominiums
- Shelter Creek Condominiums
- Cherry Avenue Villas

In this case, multiple owners occupy a single parcel. To allocate the fair share of the stormwater fee for each owner on a jointly owned parcel, the impervious area of the parcel was divided by the number of owners on the parcel.

Example: a parcel in the R-4 Zoning district has an area of 50,000 square feet and contains 100 condominium units. The impervious factor for an R-4 parcel is 85 percent. The impervious area calculation is:

50,000 SF x 0.85/100 = 425 SF

SECTION 2.2 SUMMARY OF PIFS AND EXCEPTIONS

There are 14 different zoning designations within the City. The table below lists the various zoning designations and the PIFs determined for each zone.

Zoning*	Zoning Definition**	Estimated PIF***
R-1	Single-Family Residential	60%
R-2	Low Density Residential	70%
R-3	Medium Density Residential	85%
R-4	High Density Residential	85%
C	General Commercial	90%
C-B-D	Central Business District	95%
C-M	Commercial Manufacturing	95%
C-N	Neighborhood Commercial	95%
C-O	Community Office	90%
A-R	Administrative and Research	90%
M-1	Industrial	95%
O	Open Space/Urban Parkland	10%
P-D	Planned Development	Varies
Undesignated	Undesignated	95%

** Zoning attribute table field in Zoning GIS layer provided by Lynx GIS*

*** Description per San Bruno Municipal Code*

**** Developed from statistics for similar communities and from analysis of San Bruno aerial imagery*

The final impervious values are listed along with the fees for each parcel within the city in Appendix A.

SECTION 3 - Parcel Inventory and Zoning Acreages

The following table summarizes the various zoning categories, the number of parcels in each category, square footage, and acreage. Categories in which the PIF varies due to exceptions are noted below.

Parcel Count, Gross Area and Impervious Areas per Zone

Zoning	Zoning Description	No. Parcels	Gross Area (Sq. Ft.)	Calculated PIF	Impervious Area (Sq. Ft.)
A-R	Administrative and Research	12	612,039	90%	550,835
C	General Commercial	219	2,270,260	90%	2,040,984
C-B-D	Central Business District	111	614,687	95%	583,953
C-M	Commercial Manufacturing	11	159,769	95%	151,781
C-N	Neighborhood Commercial	75	1,071,337	95%	751,322
C-O	Community Office	6	657,483	90%	591,735
M-1	Industrial	135	2,004,339	95%	1,239,021
O	Open Space	59	23,996,610	Varies	4,270,886
P-D	Planned Development	1,455	13,330,557	Varies	10,145,522
R-1	Single-Family Residential	8,755	62,728,385	Varies	35,786,596
R-2	Low Density Residential	1,052	4,849,104	70%	3,394,373
R-3	Medium Density Residential	38	273,932	85%	232,842
R-4	High Density Residential	988	3,223,744	85%	1,850,089
U	Undesignated	18	1,370,616	95%	1,301,353
Total		**12,934**	**117,162,862**		**62,891,291**

SECTION 4 – Revenue Requirements & Fee Calculations

SECTION 4.1 – REVENUE REQUIREMENTS

The drainage fees collected by the City will be used to fund the following items:

- Design and construct the required storm drain improvements, including new storm drain facilities needed to provide residents and business with adequate flood protection and replacement of the City's existing storm drain system, taking into account bond issuance and/or other financing costs, including incidental and administrative costs;
- Maintain, service, repair, operate and periodically replace the aforementioned improvements; and
- Administer the fee and the program of improvements, repairs, maintenance and replacements, including incidental and administrative costs.

In 2014, The City commissioned a Storm Drain Master Plan to identify localized flooding that had raised concerns from the impacted residents. The study identified a maximum flow from a 25-year storm that exceeded the system's capacity in all six watershed areas. A new Capital Improvement Plan (CIP) was developed to address the system's capacity deficiency. The recommended improvements are shown in the table below. Costs have been escalated by 17.53% to be expressed in current year dollars.

Priority	Project ID	Estimated Cost (2020$)	Description and Location	Constructed	Problem
1.1	A-1	$5,958,771	Belle air box: north side of Pine Street	1900s	Existing RCBs are undersized
1.1A	A-4, A-5	$8,685,467	Other pipeline upsizing to prevent need for detention basin in Crestmoor Canyon	N/A	Water retention during periods of heaving rain
1.1B	A-2	$3,138,051	Upsize the Belle Air storm drain by adding a third 9' x 5' Reinforced Concrete Box (RCB).	N/A	Backwater caused by the undersized system impacts much of the lower City watersheds
1.2	E	$2,303,588	Pipeline improvement: 7th and Angus Avenues adjacent to pump station	1960s	Existing pipes are undersized
1.3	C-1	$176,295	Bolt manholes and install catch basin backflow preventers in the vicinity of San Mateo, Huntington, Angus and Kains Avenues	1900s	Flat area; existing ground elevations are low; existing pipe has very shallow cover
1.4	F	$2,221,317	Pipeline improvement: San Bruno Avenue East	1960s	Existing pipes are undersized

2.1	C-2	$2,632,672	Pipeline improvement: North of Jenevein Avenue & El Camino Real	1900s	Existing pipes are undersized
2.2	C-3	$1,657,173	Pipeline improvement: Jenevein Avenue between Hazel & Cypress Avenues	1900s	Existing pipes are undersized
2.3	A-3	$963,746	Pipeline improvement: El Camino Real at 380 undercrossing	1970s	Existing pipes are undersized
2.4	C-4	$1,621,914	Pipeline improvement: Whitman Way between Madison Avenue & Eastburn Court	1950s	Existing pipes are undersized
2.5	B-1	$1,281,077	Pipeline improvement: Huntington Avenue at Cupid Row	1900s	Existing pipe has insufficient capacity due to flat slope
2.6	B-2	$105,077	Concrete channel at City Park: south side of Crystal Spring Avenue	Park	Existing channel is undersized and running into parking lot
2.7	D	$258,566	Catch basins at San Antonio Avenue	1900s	Existing street geometry has insufficient capacity for the overland flow
Total		**$31,004,414**			

SECTION 4.2 – ANNUITY CALCULATIONS

The City intends to design and construct the necessary storm drain improvements over a 30-year period. After all facilities have been constructed, the fee will continue to be levied as needed to fund annual maintenance and periodic repair and replacement. It is estimated that 85% of the construction will be funded within 20 years. The new and replaced facilities are summarized below.

New Construction Funding Needs (2020$)	$31,004,414
Capital Replacement Funding Needs (2020$)	$22,889,700
Total Funding Needs (2020$)	$53,894,114

The design and construction of the improvements will be funded by a combination of municipal bond issuances and pay-as-you-go funding. The annual budget needed to complete the recommended improvements is approximately $1.88 million per year.

In addition to the implementation of the recommended improvements, the City plans to add two regular maintenance workers. The existing operating expenditures plus the additional maintenance workers will come to $1,362,000 in 2022 dollars. For the purposes of analysis, this amount is assumed to escalate by 3% per year.

The $1.88 million in capital funding and the $1.36 million in operations and maintenance funding total the $3.24 million[2] in annual expenditures that will be used to fund both requirements.

A cash flow financial analysis showing the issuance of three separate bonds in 2022, 2027 and 2032 is included in Appendix B.

[2] This fee is estimated to fund $3.14 million of the $3.24 million budget requirement.

SECTION 4.3 – FEE CALCULATION

In order to determine the fee for each parcel, the total impervious area within the City was estimated based on the zoning and lot size. The annual cost of $3.14 Million divided by the total impervious area of the City (62,891,291 sq. ft.) equates to $0.0498859 per sq. ft. of impervious area.

The following table summarizes the Median Fee for each land use.

Median Fee for Each Land Use

Zoning	No. Parcels	Median Fee
A-R	12	$476.25
C	219	$272.26
C-B-D	111	$178.66
C-M	11	$397.31
C-N	75	$169.17
C-O	6	$2,508.30
M-1	135	$236.96
O	59	$476.65
P-D	1,455	$54.91
R-1	8,755	$153.67
R-2	1,052	$171.92
R-3	38	$235.91
R-4	988	$52.76
U	18	$1,242.54

SECTION 4.3 – STORM DRAINAGE AND FLOOD PROTECTION FEE CALCULATIONS

The amount of the Storm Drainage and Flood Protection Fee for each individual parcel shall be computed as follows: Parcel square footage shall be multiplied by the percentage of impervious surface on the parcel. The resulting number shall be multiplied by the storm drain fee rate., which shall be the per square foot impervious surface rate in order to calculate the dollar amount of the fee. For the current fiscal year, the storm drain fee rate is $0.0498859.

This fee will be subject to annual adjustments based that cannot exceed the change in the San Francisco Bay Area Construction Cost Index (CCI) as published by Engineering News Record (ENR).. When the maximum annual rate is adjusted for inflation, the annual fee levy may be adjusted accordingly for the following fiscal year. Likewise, when the impervious surface of a parcel is increased or decreased,

the annual fee amount shall be adjusted for the fiscal year next succeeding the change in impervious surface.

The annual fee for each parcel within the City of San Bruno is included in Appendix A.

SECTION 5 – Proposition 218 Compliance

The following section details the proposed fee's compliance with Proposition 218.

Article XIII, Section D of the California Constitution (Proposition 218) Section 6.b of Prop. 218 sets forth the following key requirements for all new, extended, imposed or increased fees and charges:

1. *"Revenues derived from the fee or charge shall not exceed the funds required to provide the property-related service."*

Section 4 of this report details the expenditures required to make the necessary storm drain improvements and demonstrates that the fee will not exceed what is needed for construction, replacement, operations and maintenance.

2. *"Revenues derived from the fee or charge shall not be used for any purpose other than that for which the fee or charge was imposed"*

Section 4 of this report specifies all eligible expenditures and shows that will be no revenues available to spend on ineligible expenditures. If revenues do exceed the amount needed, the fee will be reduced accordingly.

3. *"the amount of fee or charge imposed upon any parcel or person as an incident of property ownership shall not exceed the proportional cost of the service attributable to the parcel"*

Section 2 demonstrates that the fee for each parcel will be proportional to the cost of the service attributable to such parcel. The methodology is based on the best available information and a benefit methodology that is accepted by the United States Environmental Protection Agency.

4. *"No fee or charge may be imposed for a service unless that service is actually used by, or immediately available to, the owner of the property in question. Fees or charges based on potential or future use of service are not permitted. Standby charges, whether characterized as charges or assessments, shall be classified as assessments and shall not be imposed without compliance with (the assessment section of this code).*

All parcels are assigned impervious surface measurements based on their current state of development – not on their potential to be developed.

5. *"No fee or charge may be imposed for general governmental services including, but not limited to, police, fire, ambulance or library services where the service is available to the public at large in substantially the same manner as it is to the property owners.*

As shown in Section 4, this fee will only be used for eligible expenditures and will not be used on general government services.

APPENDICES

APPENDIX A FEE ROLL

APN	Zoning	Zoning Description	Pct. Impervious	Exception	Impervious Sq. Ft.	Fee
