

3D PRINTING AT THE SAN BRUNO PUBLIC LIBRARY

The San Bruno Public Library offers free 3D printing services on our Dremel 3D40-FLX-01 3D Printer by reservation only. **There is a limit of one print job per week per user. Appointments must be made 72 hours in advance.**

Filament is provided at no charge. Patrons can reserve the 3D printer in one hour blocks (**must sign up for a minimum of two hours**) for printing. The reservation block should be for the total amount of time needed to print your project, plus any additional orientation time required. Print jobs must be completed by library closing times (no overnight printing jobs).

Staff can provide basic instruction in the use of the 3D printer itself for first-time users, but users are expected to have a **.stl format completed computer file/printing project prior to making a reservation**. A file is obtained from a 3D printing object library, such as Thingiverse or by creating a design using computer assisted design (CAD) software.

Patrons must email their .stl file to sbpl@plsinfo.org at least 72 hours in advance so that staff can verify the project is printable. The Library reserves the right to refuse any 3D print request.

The Library has the following PLA filament colors to choose from (subject to availability): Black, Blue, Green, Orange, Red, White

Any additional questions can be sent to sbpl@plsinfo.org.

By reserving a 3D printer, you accept the conditions set forth in the San Bruno Public Library's 3D printer policy.
